# A STUDY OF LABOUR MOBILITY BASED ON UNEMPLOYMENT INSURANCE RECORDS

In view of the general interest in labour mobility as well as the dearth of material in this field in Canada, it was decided to explore the possibility of obtaining useful information from the records of the Unemployment Insurance Commission, even though these data cannot provide a complete record of all job changes. The present article is concerned with an experimental study of job changes within the Canadian population covered by unemployment insurance for the years 1952 to 1956 inclusive. A companion study for more recent years is in prospect.

In May or June of each year a record is secured showing the unemployment insurance number, age, sex, National Employment Service local office area, and occupational and industrial attachment of each individual in the insured population. Since insurance numbers are assigned for life, it is possible to trace changes in the location, occupation and industry of insured persons from year to year by means of their insurance number identification. The study was based on a 1 per cent sample of book renewal records. It identified industries and occupations according to the standard systems of classification[1] adopted by the Dominion Bureau of Statistics, using the most detailed classifications provided for in these systems, or what is known technically as three-digit codes. Thus the study identifies about 300 industrial sub-groups and about the same number of occupational sub-groups. There are over 200 National Employment Service local office areas in Canada, each local office having its own code number and all local offices within a province having the first digit of the code in common. Thus the material furnished a wealth of information on industrial and occupational mobility and on geographical mobility as well, insofar as a change in job involved crossing the boundaries of a local office area.

The records were tabulated by age and sex in the industrial, occupational, and geographical detail set out above. Records for successive years were matched, so that changes in mobility could be examined from year to year. A separate count was made of job changes involving single variables, and those involving more than one of the three recorded variables.

An assessment of results requires a general appreciation of the character of the basic data. First, it must be kept in mind that although the records cover a four-year period they show the circumstances of insured persons only at five points in time. Accordingly, they may be expected to understate the number of job changes made by persons in the sample. For example, they would not record the first change made by a worker who had changed jobs twice between two consecutive book renewal dates.

It should also be kept in mind that no new cases were added after the original one per cent sample was drawn from 1952 records. Between midsummer 1952 and 1956, it is to be expected that some persons in the sample would leave insured employment; a few would die; others would take jobs in uninsurable employment or withdraw from the labour force.

Finally, it should be noted that the Unemployment Insurance Act does not cover all paid workers. In 1952, the insured population approximated 3 million persons, about three-quarters of total paid workers. The principal exclusions during the period of the study were: most agricultural occupations, hospital employees and nurses, teachers, private domestic service employees, permanent government service employees, police, fishermen, and salaried workers over the $4,800 insurable earnings limit.

Two sets of measurements were made. First, the aggregate of changes made between 1952 and 1956 were expressed as a percentage of the total changes that could have been shown on the records for this period. In calculating total mobility, a job change involving any one of the three variables, industry, occupation and local office area was counted as equal to complex changes involving two or three variables. Over these four years, book renewal records might show a person in the same position from 1952 to 1956. On the other extreme, they might indicate a change each year, or a total of four changes. For 100 persons, the maximum number of changes which could be recorded in four years would be 400 and the corresponding mobility rate would be 100 per cent. Second, rates of job changing were calculated for successive pairs of years.

## Results of the Study

In the period 1952-56, the total mobility rate for Canada as a whole (as defined above) was 55 per cent. In other words, more than half the insured population changed jobs at least once a year on the average, the changes involving either industry, occupation or local office area or some combination thereof. One variable accounted for 62 per cent of job changes, two variables for 30 per cent, and three variables for 8 per cent of the changes. Thus, a majority of moves were of a simple nature, although a substantial proportion were complex moves involving a change of two or three variables.

The complexity of moves tended to remain approximately the same for each year. Changes involving a single variable ranged from 60 per cent in 1952-53 to 64 per cent in 1953-54, and changes in all three variables from 7 per cent in 1954-55 and 1955-56 to 10 per cent in 1952-53.

[1] See *Standard Industrial Classification Manual*, Dominion Bureau of Statistics, 1948, and *Classification of Occupations, Ninth Census of Canada, 1951*, Dominion Bureau of Statistics.

Males were slightly more mobile than females, the rates being 56 per cent for males and 52 per cent for females. Mobility figures by year showed males with a low of 55 per cent in 1953-54 and a high of 59 per cent in 1955-56. Females recorded a low of 51 per cent in 1952-53 and 1953-54 and a high of 55 per cent in 1955-56.

Change of occupation was more common than change of industry or area. It was involved in 77 per cent of job changes, with industry being a factor in 51 per cent, and local office area in 19 per cent. Males tended to change industry less often and local office area and occupation more often than females.

**Per Cent of Job Changes Involving Specified Variables, 1952-56**

| | UIC Local Office area | Occupation | Industry |
|---|---|---|---|
| Males | 20 | 77 | 49 |
| Females | 15 | 73 | 54 |
| **Totals** | **19** | **76** | **51** |

When job changes were grouped according to the variables involved, the following distribution resulted:

| Variables | | 1952-56 |
|---|---|---|
| | | % |
| One variable | —Occupation | 42.0 |
| | Industry | 15.0 |
| | UIC Local Office | 5.0 |
| Two variables | —Occupation and industry | 24.0 |
| | Industry and Local Office | 3.0 |
| | Occupation and UIC Local Office | 3.0 |
| All three variables | | 8.0 |
| **Totals** | | **100.0** |

An examination of mobility rates by age showed that workers under 20 years of age were the most mobile and those between 45-64 were the least mobile. As age increased, mobility decreased from 67 per cent for those under 20 years of age to 50 per cent between ages 45 to 64, then increased to 55 per cent for those 65 years of age and over. Similar patterns were found for both male and female workers.

The complexity of moves tended to decrease as age increased. The rates of change involving all three variables decreased from 13 per cent for under 20 years of age to 3 per cent for 65 years of age and over. The percentage involving two variables decreased from 38 for those under 20 years of age to 26 for persons 45 to 64 years of age, then increased to 34 for those 65 years of age and over. The percentage involving only one variable increased from 49 for under 20 years of age to 69 for 45 to 65 years of age, then decreased to 63 for 65 years of age, and over.

The percentage of the three variables involved in job changes showed significant differences by age-group. Changes involving local office area decreased from 23 per cent for persons under 20 years of age to 10 per cent for those 65 years of age and over. The percentage of changes involving occupation remained fairly constant around 76 per cent as age increased, while changes involving industry decreased from 64 per cent for under 20 years of age to 45 per cent for ages 45 to 64, then increased to 55 for 65 years of age and over.

### Provincial Analysis

Inter-provincial movement was predominantly westward and moves to nearby provinces far exceeded those to more distant provinces. The largest movement of Maritime workers outside their own area was to Ontario, although New Brunswick workers favoured Quebec over Ontario. A westward movement out of Manitoba and Saskatchewan to British Columbia and Alberta was relatively large. However, the greatest over-all inflow was to Ontario, which attracted workers from all provinces. Conversely, the movement out of Ontario was comparatively small.

In making an analysis of mobility within each Province, account was taken of all three variables, UIC local office area, occupation and industry. There were substantial differences in the mobility ranking of the provinces based upon local office area alone, and upon local office area plus occupation and industry. These differences may be noted from the two following statements:

**Provincial Mobility Ranking Based Upon UIC Local Office Area Only**

| Mobility percentage | Provinces |
|---|---|
| 10-14 | Prince Edward Island |
| 15-19 | Newfoundland, Nova Scotia, Quebec, Ontario |
| 20-24 | Alberta, British Columbia |
| 25-29 | Manitoba, Saskatchewan |
| 30-34 | New Brunswick |

**Provincial Mobility Ranking Based Upon UIC Local Office Area, Occupation, and Industry**

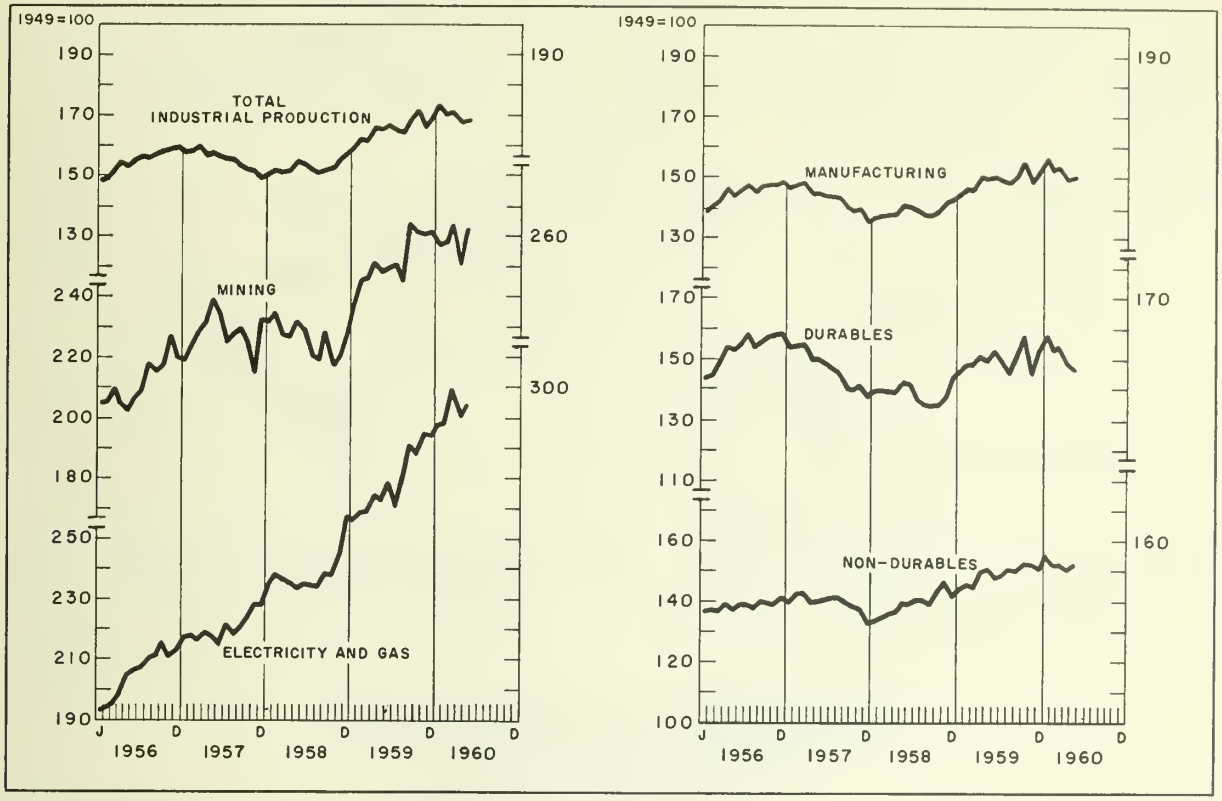

| Mobility percentage | Provinces |
|---|---|
| 50-54 | Ontario, Manitoba |
| 55-59 | Newfoundland, Nova Scotia, New Brunswick, Quebec |
| 60-64 | Prince Edward Island, Saskatchewan, Alberta, British Columbia |

Manitoba occupied a low position in the second ranking principally because of a lower-than-average occupational mobility rating. Apart from Manitoba, western provinces recorded relatively high mobility ratings in both statements. New Brunswick had an unusually high local office area mobility, but was very little above average when occupation and industry were taken into consideration. Quebec and Ontario were the only provinces below the Canada average in both ratings.

It seems likely that differences in the two sets of provincial measurements reflect mainly differences in the occupational and industrial patterns of the provinces, rather than material differences in work attitudes and aptitudes of insured persons themselves.

## INDUSTRIAL PRODUCTION*

The index of industrial production rose by 1 per cent in May, primarily a result of the sharp increase in mining production.

## PRODUCTION

ADJUSTED FOR SEASONAL VARIATION

| | Gross National Product at Market Prices | | Total Industrial Production | Mining Production | Manufacturing Production | | | Electricity and Gas |
|---|---|---|---|---|---|---|---|---|
| | Total[2] | Non-farm[2] [3] | | | Total | Durables | Non-durables | |

*A more detailed breakdown of Industrial Production, Seasonally Adjusted, can be found in Table 6.

[1]Averages or totals of unadjusted data. [2]Seasonally adjusted at annual rates. [3]Gross National Product at market prices excluding accrued net income of farm operators from farm production.

## EMPLOYMENT AND HOURS WORKED*

The composite index of industrial employment remained unchanged in May, though employment in building and general engineering increased.

Average hours worked per week continued to decline to the last pay period in May.

## EMPLOYMENT AND HOURS WORKED

ADJUSTED FOR SEASONAL VARIATION

| | Industrial Composite Employment[2] | Manufacturing[2] | | | Construction: Building and General Engineering[2] | Mining[2] | Average Hours Worked per Week in Manufacturing[2] | | |

[1]Averages of unadjusted data. [2]Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

The total labour force declined, though the persons with jobs increased. The percentage seeking work decreased to 6.3 per cent of the total labour force.

Total labour income and labour income in manufacturing declined in May.

## LABOUR FORCE AND LABOUR INCOME

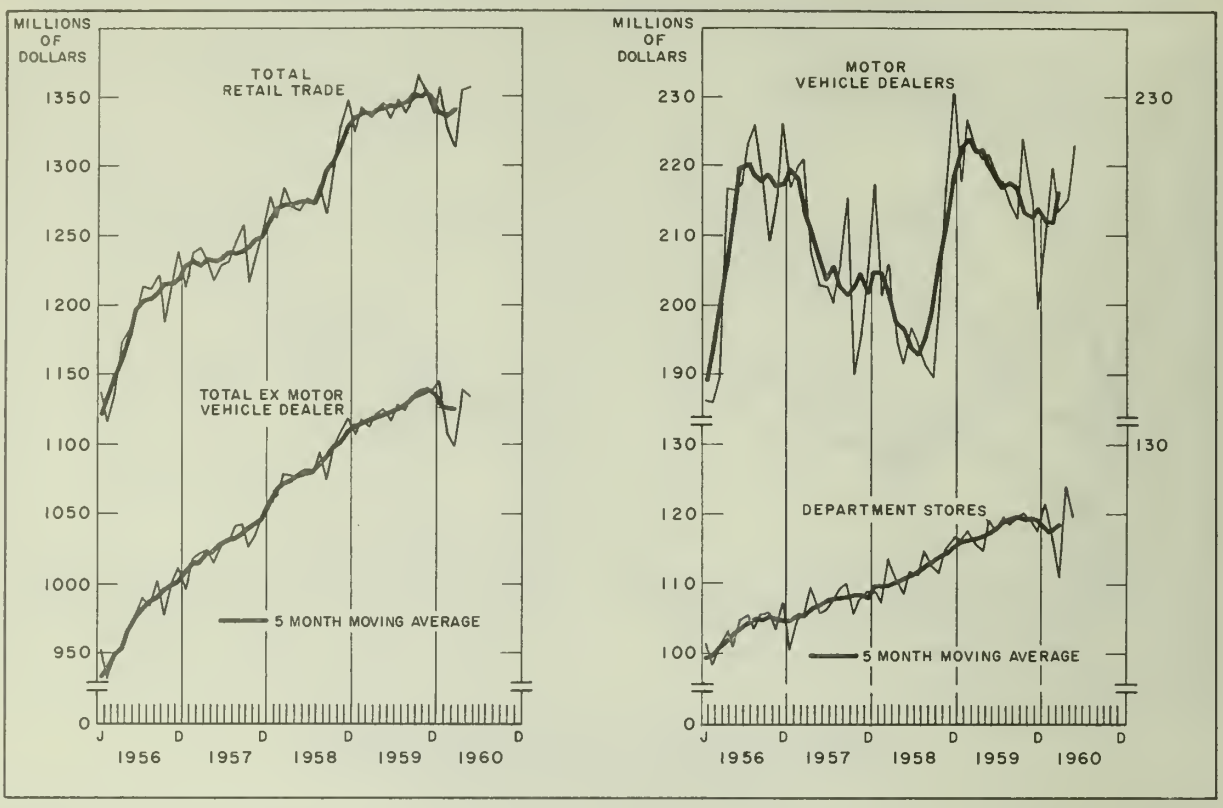

ADJUSTED FOR SEASONAL VARIATION

[1]Averages of unadjusted data. [2]Percentage seasonally adjusted. [3]Revisions in the raw data for November, 1957 through June, 1958 are not incorporated in this series. [4]Series re-worked and therefore not comparable with previous series.

## RETAIL TRADE*

Total retail trade was unchanged in May, largely as a result of the increase in sales of motor vehicle dealers. Retail trade ex motor vehicle dealers and department store sales declined.

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. (6)Average of weekly rates. (7)Revised according to new bench marks. (8)This total includes all generating agencies producing over ten million kilowatt hours per year. (9)End of period. Including personal savings deposits.

(1) "De facto" population. Annual data are for June. (2) At current market prices. Annual data are totals of the four quarters. (3) Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4) All manufactured products. (5) Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates. (6) Annual data are for June.

Note.—Until the end of 1958, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1959 and 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

NOTE: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926–1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

[1]The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. [2]Includes adjusting entry. [3]Includes residual error of estimate. [4]This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. [5]Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."**

[1]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1] The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. [2]The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1).

[1]These totals include all generating agencies producing over ten million kilowatt hours per year. [2]These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3]Less imports. [4]Total net generation less net exports. [5]Mainly the amount used in electric boilers. **Source: Monthly Report, Electric Power Statistics, D.B.S.**

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

**Source: Monthly Report on Primary Iron and Steel—D.B.S.**

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]Includes some silvery pig iron formerly included with ferro-alloys. [2]Excluding shipments for processing. [3]Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings. [4]Monthly average. [5]Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]End of period. [2]Does not include apartment-type machines. [3]Electric and other. [4]Gas types are included. [5]In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. **Source: Monthly Reports, Domestic Electric Refrigerators, Domestic Washing Machines, Trade of Canada, and Radio and Television Receiving Sets, D.B.S.**

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis.

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division. D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959 ,stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks. [7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958–31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

[1]Does not include re-exports. [2]As from January 1958, the export total, the three indexes and the "miscellaneous commodities" total exclude various non-commercial and special transactions (mainly "settler's effects" and "private donations and gifts") previously included in domestic exports. During 1958 these transactions averaged approximately $2,900,000 per month. For a more detailed explanation see Trade of Canada (Exports) January 1960. [3]As from January 1958, includes square timber, formerly included with "Other wood and paper." [4]As from January 1958, excludes square timber, now included with "Lumber and timber." [5]Includes pigs, ingots, blooms and billets, castings and forgings and rolling mill products.

[1]As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. [2]Includes pigs, ingots, blooms and billets, casting and forgings, ferro-alloys and rolling mill products. **Source: Trade of Canada, D.B.S.**

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada.**

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

# CANADA'S FISHERIES.....

As early as the middle of the fifteenth century venturesome European fishermen were regular visitors to the prolific fishing grounds off Canada's Atlantic Coast . . . And here were written the first pages in the history of the nation's commercial fisheries.

Now nearly 80,000 Canadian fishermen harvest a bountiful crop of food fish from both sea and inland waters . . . and some 14,000 workers are employed in Canada's fish-processing and handling industries.

About 150 kinds of fish and shellfish are taken in commercial operations running in an average year to some 2,000,000,000 pounds with a marketed value of about $200,000,000. Canadians consume about 13.5 pounds per person a year and large quantities of fish and fish products are exported.

*The* Dominion Bureau of Statistics *publishes statistical information on Canada's fisheries on a monthly and annual basis. Data on production, freezings, stocks, imports, exports and prices are published in the monthly reports, and these and other data on capital equipment, employees and salaries and wages are contained in the annuals.*

Monthly Reports:
- Review of Canadian Fisheries Statistics
- Fish Freezings and Stocks

Annual Reports:
- Canada Summary
- Newfoundland
- Prince Edward Island
- New Brunswick
- Nova Scotia
- Quebec
- Ontario, Prairie Provinces and Northwest Territories
- British Columbia
- Fish Processing Industry

*A more detailed breakdown of Industrial Production, Seasonally Adjusted, can be found in Table 6.

[1]Averages or totals of unadjusted data. [2]Seasonally adjusted at annual rates. [3]Gross National Product at market prices excluding accrued net income of farm operators from farm production.

## EMPLOYMENT, EARNINGS AND HOURS WORKED*

The industrial composite employment index was higher in June, although the second quarter average was about 1 per cent below the first quarter.

Average hours worked per week were also higher in June, but were off in the second quarter by 1 per cent from the first.

| | | Industrial Composite Employment (2) | Manufacturing (2) | | | Construction: Building and General Engineering (2) | Mining (2) | Manufacturing | | Average Hours Worked per Week in Manufacturing (2) | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Total | Durables | Non-durables | | | Average Weekly Wages and Salaries | Average Hourly Earnings | Total | Durable Goods | Non-durable Goods |
| | | 1949=100 | | | | | | Dollars | | | | |
| 1957(1) | | 122.6 | 115.8 | 125.3 | 107.6 | 144.4 | 127.2 | 69.68 | 1.60 | 40.4 | 40.5 | 40.2 |

| | J | 119.5 | 110.1 | 114.0 | 106.8 | 124.4 | 119.6 | 78.21 | 1.78 | 40.1 | 40.3 | 39.9 |

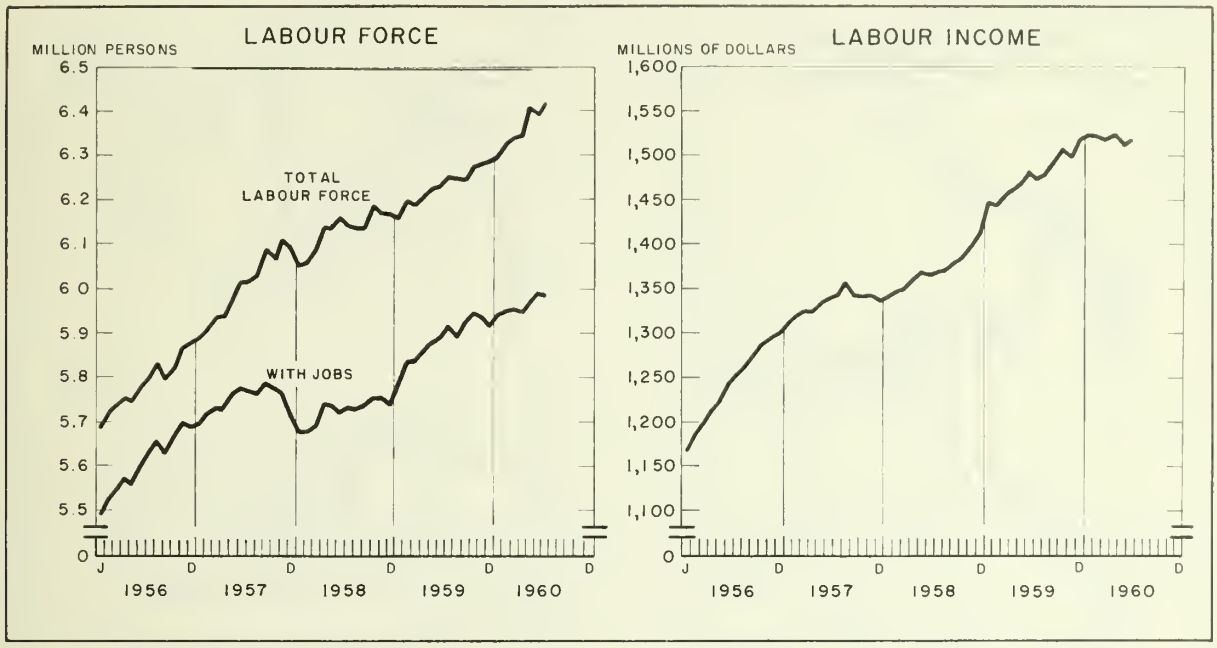

(1)Averages of unadjusted data. (2)Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

With the labour force somewhat higher in July and a small change in total persons with jobs, persons without jobs and seeking work amounted to 6.7 per cent of the labour force.

Total labour income rose in June, reflecting gains in both wage and salary rates and in hours worked.

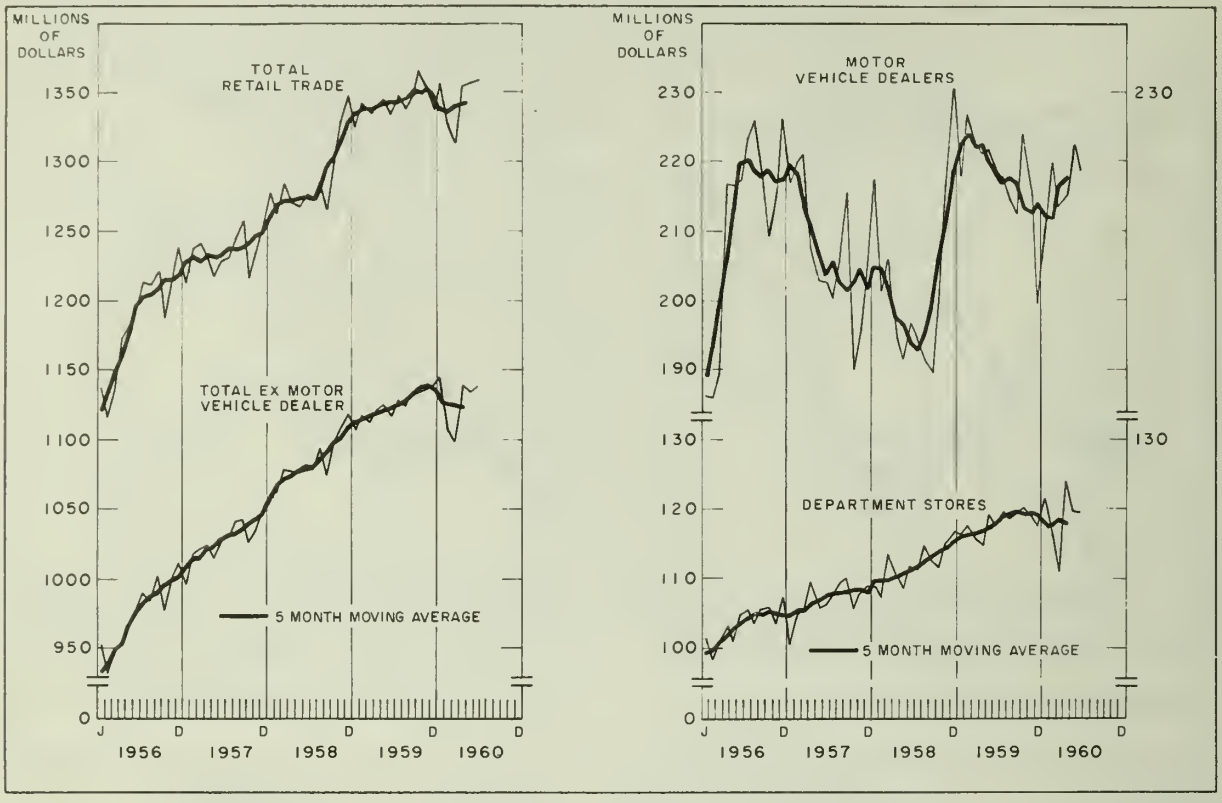

| | Civilian Labour Force | | | | | | | Registrations at National Employment Service Offices[3] | Labour Income | |

*Seasonal adjustment computed by Central Mortgage and Housing Corporation.

## EXPORTS, IMPORTS AND MISCELLANEOUS SERIES

Exports, which showed a decline of 10 per cent between the first and second quarters, rose appreciably in July and were close to the levels prevailing in the early part of 1960.

Imports declined in June, and for the second quarter as a whole were 2 per cent below the level of the first quarter.

| | Value of Domestic Exports of Goods | Value of Imports of Goods | Carloadings of Revenue Freight: Total Revenue Cars Loaded | Carloadings of Revenue Freight: Grain and Grain Products | Carloadings of Revenue Freight: All other (ex Iron Ore) | Industrial Common Stocks | Corporation Profits before Taxes (1)(4) | Personal Disposable Income (1) | Farm Cash Income | Consumer Credit Outstanding (2)(3) |

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. (6)Average of weekly rates. (7)Revised according to new bench marks. (8)This total includes all generating agencies producing over ten million kilowatt hours per year. (9)End of period. Including personal savings deposits.

(1)"De facto" population. Annual data are for June. (2)At current market prices. Annual data are totals of the four quarters. (3)Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4)All manufactured products. (5)Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates. (6)Annual data are for June.

Note.—Until the end of 1958, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1959 and 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

NOTE: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926–1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

(1)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. (2)Includes adjusting entry. (3)Includes residual error of estimate. (4)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. (5)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."** 9

[1]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1] The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. [2]The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1).

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

**Source: Monthly Report on Primary Iron and Steel—D.B.S.**

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]Includes some silvery pig iron formerly included with ferro-alloys. [2]Excluding shipments for processing. [3]Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings. [4]Monthly average. [5]Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis. **Source: New Residential Construction, D.B.S.**

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division. D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959, stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks.
[7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958-31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

[1]Does not include re-exports. [2]As from January 1953, the export total, the three indexes and the "miscellaneous commodities" total exclude various non-commercial and special transactions (mainly "settler's effects" and "private donations and gifts") previously included in domestic exports. During 1958 these transactions averaged approximately $2,900,000 per month. For a more detailed explanation see Trade of Canada (Exports) January 1960. [3]As from January 1958, includes square timber, formerly included with "Other wood and paper." [4]As from January 1958, excludes square timber, now included with "Lumber and timber." [5]Includes pigs, ingots, blooms and billets, castings and forgings and rolling mill products.

[1]As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. [2]Includes pigs, ingots, blooms and billets, casting and forgings, ferro-alloys and rolling mill products. **Source: Trade of Canada, D.B.S.**

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada.**

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2) Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes Printing and Publishing and Allied Industries.

# Canada's Forests.....

and forest-based industries play a major role in the industrial life of the nation . . . as they have for more than a Century.

On the nation's forests are based two of the great enterprises that loom large on the Canadian scene—the pulp and paper industry and the lumber industry.

Wood is so versatile it is difficult to find any form of industrial activity in which it is not used directly or indirectly.

The forests are the source of almost a third of all Canadian exports, of which newsprint, wood pulp and lumber are the foremost items.

---

The Dominion Bureau of Statistics *publishes statistical information on Canada's primary forest production and on the wood and paper products industries on a regular monthly and annual basis. The monthlies provide current production and other data, while the annuals contain detailed statistics on products shipped, employment, salaries and wages, materials and supplies used, as well as other information.*

**Monthly Reports** are issued separately on—

- Pulpwood Production
- Peeler Logs, Veneer and Plywood
- Hard Board
- Sawmills East of the Rockies
- Sawmills in British Columbia
- Rigid Insulating Board

**Annual Reports** are issued on—

- Operations in the Woods
- Lumber
- Furniture
- Roofing Paper
- Hardwood Flooring
- Sash, Door and Planing Mills
- Pulp and Paper
- Veneer and Plywood
- Miscellaneous Wood-Using Industries
- Printing Trades
- Paper Box and Bag Industry
- Miscellaneous Paper-Using Industries

Besides the above there are general reviews of the wood and paper products groups of industries.

# NATIONAL ACCOUNTS INCOME AND EXPENDITURE

## SECOND QUARTER 1960

### Introductory Review

The Gross National Product, seasonally adjusted, declined by about one and one-half per cent in the second quarter of 1960, following the slowing down in the rate of advance which was evident in the first quarter of the year. With final product prices substantially unchanged, the decline represented for the most part a drop in the physical volume of output from the level of the preceding quarter. The decline marks the first interruption in the upward course of the economy since the final quarter of 1957 when the value (and volume) of output also showed a small drop.[1]

The reversal in the trend of output in the second quarter was associated with a sizable fall-off in total final purchases of goods and services (see Table overleaf) which had shown signs of easing in the first quarter. Much of this decline was centred in external demand for exports of goods and services, which fell by 8 per cent, seasonally adjusted; exports to both the United States and other countries were affected. Final domestic demand was also somewhat lower; further declines occurred in business outlays for plant and equipment, while outlays for new housing fell sharply. These downward tendencies were partly, though not completely, offset by a substantial recovery in consumer spending following the weak first quarter. Finally, the rate of business inventory accumulation eased markedly during the quarter, representing a downward shift in terms of new demands on production of close to $300 million.

While these changes in the major categories of total demand have tended to accumulate in a downward direction in the second quarter, it should be noted that some moderating influences have recently emerged. Merchandise exports recovered strongly in July and were back up to the average levels of the first quarter. (The economies of western Europe have continued buoyant and business conditions in the United States are currently at a very high level). Non-residential building permits were higher in the second quarter, following declines in the first quarter of the year. Thus, the recent tendencies which have appeared in the export figures and in non-residential construction may be somewhat modified when later information becomes available.

The developments in the second quarter have inter-acted to yield a level of production which was about 1 per cent above the same period one year ago in value terms, but about 1 per cent below the same period one year ago in terms of the physical volume of production. Prices over the twelve months have risen by somewhat under 2 per cent.

[1] In 1957, price increases obscured the fact that the **volume** of output began moving downward in the second quarter, recovering briefly in the third, then falling further in the fourth quarter.

| | 1Q 1960 / 1Q 1959 | 2Q 1960 / 2Q 1959 | First 6 mos. 1960 / First 6 mos. 1959 |
|---|---|---|---|
| | per cent | | |
| Value of Gross National Product | 6.0 | 0.7 | 3.2 |
| Price of Gross National Product[1] | 2.0 | 1.7 | 1.8 |
| Volume of Gross National Product | 4.1 | −1.0 | 1.4 |

[1] The price comparisons shown above are based on a set of fixed weight price indexes (1955 = 100), and not upon the implicit price deflators which can be derived by dividing the value series by the volume series. The implicit deflators are weighted by changes in the expenditure pattern over time, and do not permit accurate measurements of price change. A specially constructed set of fixed weight price indexes has therefore been used for purposes of depicting price changes in the above table.

Accompanying these changes in the major demand categories in the second quarter have been associated changes in the composition and direction of the income flows. National income, which had advanced only fractionally in the first quarter, declined by 1½ per cent in the second quarter, on a seasonally adjusted basis. The decline reflected a sharp and widespread drop in corporation profits, and lower returns from other forms of investment income and unincorporated business operations. The flow of income to the business sector was thus substantially reduced in the second quarter.

Turning to the personal account, labour income, which had risen uninterruptedly from quarter to quarter since early in 1958, showed virtually no change in the second quarter of 1960; declines in major goods-producing industries were offset, broadly, by advances in the services sector. Accompanying this stability in labour income, declines occurred in most other forms of personal income in the quarter with the major exception of transfer payments, which rose slightly. On balance, total personal income showed a fractional decline in the quarter, amounting to about one-half of one per cent. This decline in personal income was accompanied by an increase in direct personal tax collections, so that personal disposable income was down to a somewhat greater extent, by about 1½ per cent. With consumer buying higher, the rate of personal saving fell sharply, to 3.9 per cent of personal disposable income. The second quarter decline brought the level of disposable income to a point approximately equal to that of the second quarter one year earlier. Thus,

GROSS NATIONAL PRODUCT DECLINED IN THE SECOND QUARTER, FOLLOWING THE SLOW-DOWN IN THE RATE OF ADVANCE WHICH WAS EVIDENT IN THE FIRST QUARTER OF THE YEAR

BILLIONS OF DOLLARS

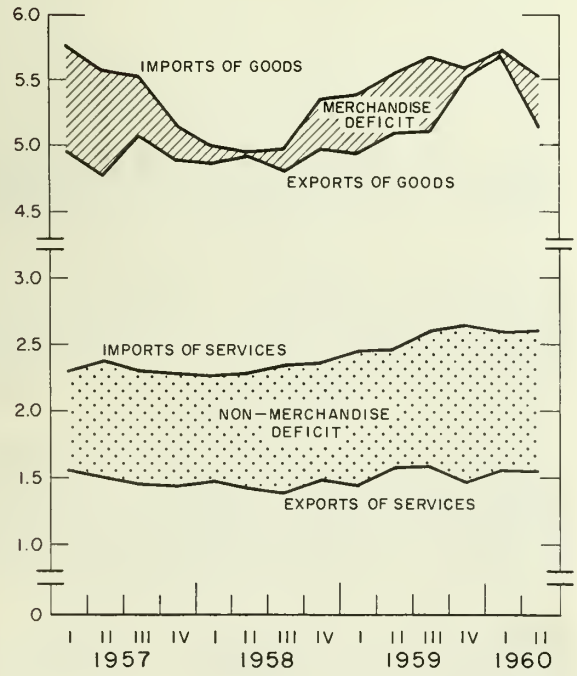

BUSINESS OUTLAYS FOR PLANT AND EQUIPMENT WERE LOWER IN THE QUARTER, AND OUTLAYS FOR NEW HOUSING FELL SHARPLY. THE RATE OF BUSINESS INVENTORY ACCUMULATION EASED

BILLIONS OF DOLLARS

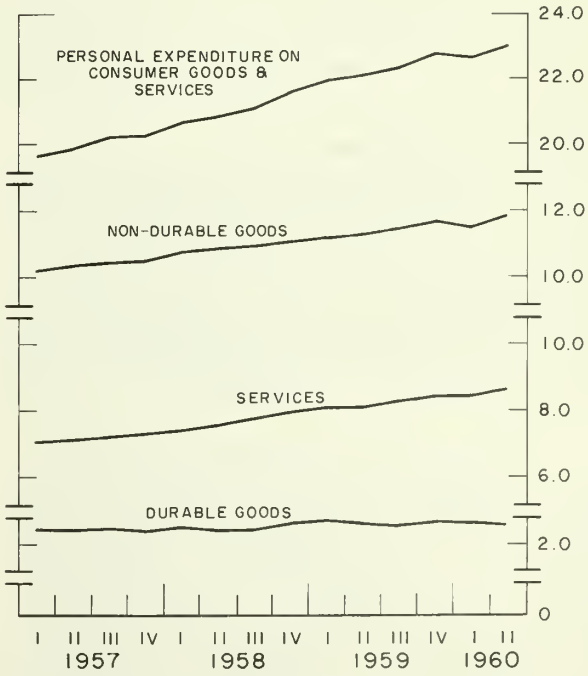

EXPORTS OF GOODS ALSO MOVED DOWN IN THE QUARTER. WITH IMPORTS OF GOODS SHOWING A SMALLER DECLINE, THE DEFICIT ON MERCHANDISE ACCOUNT WIDENED APPRECIABLY

BILLIONS OF DOLLARS

CONSUMER SPENDING MADE A SUBSTANTIAL RECOVERY, FOLLOWING THE WEAKNESS WHICH HAD DEVELOPED IN THE FIRST QUARTER

BILLIONS OF DOLLARS

(IN ALL CHARTS DATA ARE SEASONALLY ADJUSTED AT ANNUAL RATES)

disposable income has shown little change over the past twelve months. This retardation in the rate of growth of both personal and disposable income over the past year appears to be a factor of some significance in the development of recent trends in consumer spending. The latter has risen only moderately in 1960, although it moved forward in the second quarter despite the fall-off in disposable income.

Despite reduced business and personal incomes, the flow of revenues to the government sector continued upward in the second quarter. Direct personal tax collections were higher by 10 per cent, partly reflecting the payment in April of tax arrears on income for the year 1959. At the same time, indirect taxes, seasonally adjusted, were also slightly higher in the second quarter, reflecting for the most part gains in Federal excise taxes. Direct taxes on corporations (on an accrual basis) fell off during the quarter, reflecting the sharp drop in corporation profits. Over all, however, the revenues of the government sector are estimated to have risen by about 2 per cent during the quarter, and were running at an annual rate approximately $1 billion (or 9 per cent) above the level of the second quarter of 1959. About half of this increase was in the Federal sector. At the same time, Federal expenditures have shown little change over the past year, so that the deficit has narrowed by the full extent of the increase in revenues. In the provincial-municipal government sectors, expenditures have tended to rise along with revenues and the deficit has shown only a moderate improvement.

The table below shows the percentage changes in some of the main income categories from the first half of 1959 to the first half of 1960, compared with those which occurred in the same period one year earlier.

**Changes in Major Components of Income**

(Seasonally adjusted at annual rates)

| Selected personal and business income components | Per cent change | |
|---|---|---|
| | First half 1958 to first half 1959 | First half 1959 to first half 1960 |
| 1. National income | 7.5 | 2.4 |
| 2. Personal income | 6.7 | 3.1 |
| 3. Disposable income | 6.2 | 1.8 |
| 4. Wages and salaries | 7.7 | 4.3 |
| 5. Corporate profits before taxes | 21.7 | -2.3 |
| 6. Net income of non-farm unincorporated business | 4.0 | -4.2 |

**Production and Employment**

The movement of production by industry in the second quarter reflected the changes in the major categories of demand outlined above. On a seasonally adjusted basis, the volume of total real output is estimated to have declined by close to 1½ per cent. The decline was wholly attributable to the goods-producing industries in which production was down nearly 3 per cent; output in the service-producing industries made a small advance.

The contraction in manufacturing production of about 3 per cent in the second quarter was widespread by industry but more pronounced in the durable sector (5 per cent) than in the non-durable groups (1½ per cent). Production expanded fractionally in one of the major durable groups, namely non-ferrous metal products; in all others, output contracted, the declines ranging from 4 per cent in wood products and 5 per cent in transportation equipment to 7 per cent in iron and steel, electrical apparatus and supplies and non-metallic mineral products. Among individual durable goods industries showing a sharp contraction in output were iron castings, gypsum products and telecommunications equipment; the loss in output in each of these industries exceeded 20 per cent. The fall in output of 15 per cent in concrete products and of 14 per cent in primary iron and steel was also relatively large. In agricultural implements, heating and cooking apparatus, refrigerators and appliances, motor vehicles, motor vehicle parts and wire and wire goods the decline in production was somewhat in excess of the average for durable manufactures as a whole.

The changes in output in the non-durable manufacturing industries were for the most part also in a downward direction, though the declines were generally small. A modest gain in output occurred in products of petroleum and coal and fractional increases in foods and in the miscellaneous group. In most other non-durable goods industries production fell off a little. Exceptions were textiles and tobacco, where output fell 5 per cent and the rubber industry, where there was a sharp contraction, amounting to 17 per cent.

A 1½ per cent drop in mining production, seasonally adjusted, in the second quarter was the

outcome of conflicting trends among and within the component groups. In fuel mining a sharp advance in output of natural gas (23 per cent) and a significant gain in output of crude petroleum (7 per cent) more than offset the continuing decline in coal mining, raising production of fuels by 6 per cent. Reflecting a substantial improvement in production of asbestos, output in non-metal mining was up 3 per cent. Production in metal mining fell 8 per cent, reflecting the sharp cut-backs in operations in the uranium mines and a small decline in output of copper; production of other major metals and minerals was higher, the largest gains being in iron ore and nickel (13 and 6 per cent). Quarrying, the remaining component of the mining industry, showed a drop in output of 6 per cent in the second quarter.

The volume of activity in the construction industry continued to decline in the second quarter. Output was down about 7 per cent, reflecting the drop in expenditures for housing and the easing in activity in other construction. Likewise in forestry, the rate of decline was substantial and higher than in the previous quarter.

In the other industries and in most of the service-producing industries, output continued to advance in the second quarter, with the overall gain amounting to about 1 per cent.

Despite the drop in production in the second quarter, the first six months of 1960 compares favourably with the same period a year ago for production as a whole as well as for almost all the major industrial groups. The two exceptions are construction and agriculture. Conspicuously large gains occurred in forestry and public utilities. A small decline in farm output reflects lower production of livestock and poultry, largely offset by expanded output of most other farm products. The gain of about 1½ per cent in overall output on the six months basis reflects advances of about equal magnitude in both the service-producing industries and the goods-producing industries.

The decline in total production in the second quarter, seasonally adjusted, was accompanied by an increase in the total number of persons with jobs of about 0.5 per cent, and of nearly 1 per cent in the non-farm sector. It was also accompanied by somewhat shorter hours of work in some industries. However, the number of persons without jobs and seeking work averaged 6.5 per cent of the labour force in the second quarter, compared with 5.9 per cent in the first quarter. (All of these comparisons are on a seasonally adjusted basis).

Comparing the first six months of this year with the same period of the previous year, the number of persons with jobs was higher by about 2 per cent in total and by more than 3 per cent in the non-farm sector.

**Personal Expenditure on Consumer Goods and Services**

Personal expenditure resumed its upward course in the second quarter, following the hesitation evident in the first. At a seasonally adjusted annual rate of $23.1 billion, consumer expenditure was more than 1½ per cent higher than in the preceding quarter. Since there was little evidence of any marked overall change in consumer prices, most of the increase in spending represented a gain in real consumption. The notable feature of the quarter was that the expansion in spending was not supported by enhanced demand for durable goods but rather reflected recovery in non-durable markets and further growth in spending for services.

The second quarter's advance in spending for non-durables of more than 2 per cent was the outcome of gains in almost all non-durable lines. Particularly notable is the more than 3 per cent increase in purchases of clothing following the decline in the first quarter. Expenditures on food also rose a little following the previous quarter's decline, but all of the increase was due to price increases. The rise in spending on tobacco products and on auto parts and accessories was also well in excess of the average for non-durables as a whole.

The 2 per cent drop in purchases of durables is largely attributable to household durables although purchases of cars were also off slightly. All categories of household durables were affected, the sharpest decline being in sales of radios and electrical appliances which were off 7 per cent in value terms. Factory shipments of most major appliances in the second quarter were lower than a year ago by: 16 per cent for washers; 5 per cent for dryers; 11 per cent for electric stoves; 12 per cent for radios; 28 per cent for television sets. The contraction in spending on durables may be related in part to the much reduced level of activity in housing. In a situation of declining sales there was a fairly general tendency for prices to shade downward so that the volume of purchases was slightly higher than the value figures indicate.

Expenditures on services continued their upward trend in the second quarter. The gain of 2 per cent reflects in part changes in the adjustment for net expenditure abroad. Excluding this, the increase is 1½ per cent. Most of the major categories showed gains. As in the past, the rise in spending on services reflected some element of price increase.

When the first half of 1960 is compared with the corresponding period of the previous year, the gain in consumer spending amounts to 4 per cent. In most of the durable categories, the year-over-year comparison is unfavourable. Thus the increase in spending was concentrated in the non-durable and service categories, particularly the latter. It may be noted that the over-the-year increase in consumer spending in volume terms is somewhat below the average for the post-war years, and that this development has been associated with a smaller than average rise in real disposable income.

**Consumer Expenditure**

| | Per cent change | |
|---|---|---|
| | 6 mos. 1959 / 6 mos. 1958 | 6 mos. 1960 / 6 mos. 1959 |
| Food | 2.7 | 2.9 |
| Clothing | 4.2 | 1.8 |
| Other | 5.6 | 7.3 |
| Total non-durable goods | 4.1 | 4.3 |
| Appliances and radios | 7.1 | -3.0 |
| Home furnishings and furniture | 3.0 | -0.8 |
| Autos (New and used) | 14.1 | -2.2 |
| Other | 5.3 | 0.9 |
| Total durable goods | 9.4 | -1.6 |
| Total all goods | 5.1 | 3.1 |
| Total services | 7.8 | 5.6 |
| Total personal expenditure (Goods and services) | 6.1 | 4.0 |

### Business Gross Fixed Capital Formation

Gross fixed capital formation in the second quarter is estimated to have been running at a seasonally adjusted annual rate of $6.4 billion, some 7 per cent lower than in the first quarter. This decline is largely attributable to a steep decline in expenditures for housing but there was also some curtailment in outlays for plant and equipment.

Expenditures for residential construction are estimated to have fallen about 18 per cent between the first and second quarters of 1960. This trend in housing is related in part to the stringency in mortgage markets in the early months of 1960, particularly as it affected lending under the National Housing Act. Altogether, National Housing Act Loans were made for only 10,943 dwellings in the first six months of 1960, compared to 28,968 dwellings in the same period one year earlier. In the second quarter of 1960, total housing starts, seasonally adjusted, declined by 10 per cent, while total completions fell by 21 per cent, seasonally adjusted. After Central Mortgage and Housing Corporation direct loans again became available in April, starts increased in June and July. However, there was a decline in starts in August, despite further easing in the availability of mortgage money.[1]

Business outlays for plant and equipment were also off between the first and second quarters, by close to 4 per cent. Non-residential construction expenditure declined by 2 per cent, and outlays for machinery and equipment by 5 per cent. Evidence of a drop in purchases of machinery and equipment is to be found in domestic shipments as well as in imports of such goods, both of which were down by 5 per cent in the second quarter. A wide variety of machinery and equipment items were so affected.

In the first six months of 1960, business outlays for plant and equipment were running fairly close to the rate for the corresponding period of 1959, but somewhat below last year's annual rate. The shortfall from last year's annual rate is evident in outlays for both non-residential construction and machinery and equipment, but particularly in the latter. The mid-year review of investment intentions in 1960 indicated an increase of about 6 per cent in business expenditures for plant and equipment (excluding housing). Performance thus far in the year does not confirm these expectations.

### Investment in Business Inventories

The rate at which business inventories were being accumulated abated in the second quarter. At a seasonally adjusted annual rate of $280 million, accumulation was less than half as large as in the preceding quarter. Virtually all the change in the rate of investment in stocks took place in retail and wholesale trade. In manufacturing the rate of accumulation remained about the same although the emphasis shifted sharply toward the durable goods industries. Investment in business inventories by broad industrial groups in the fourth quarter of 1959 and the first two quarters of 1960 is shown in the accompanying table.

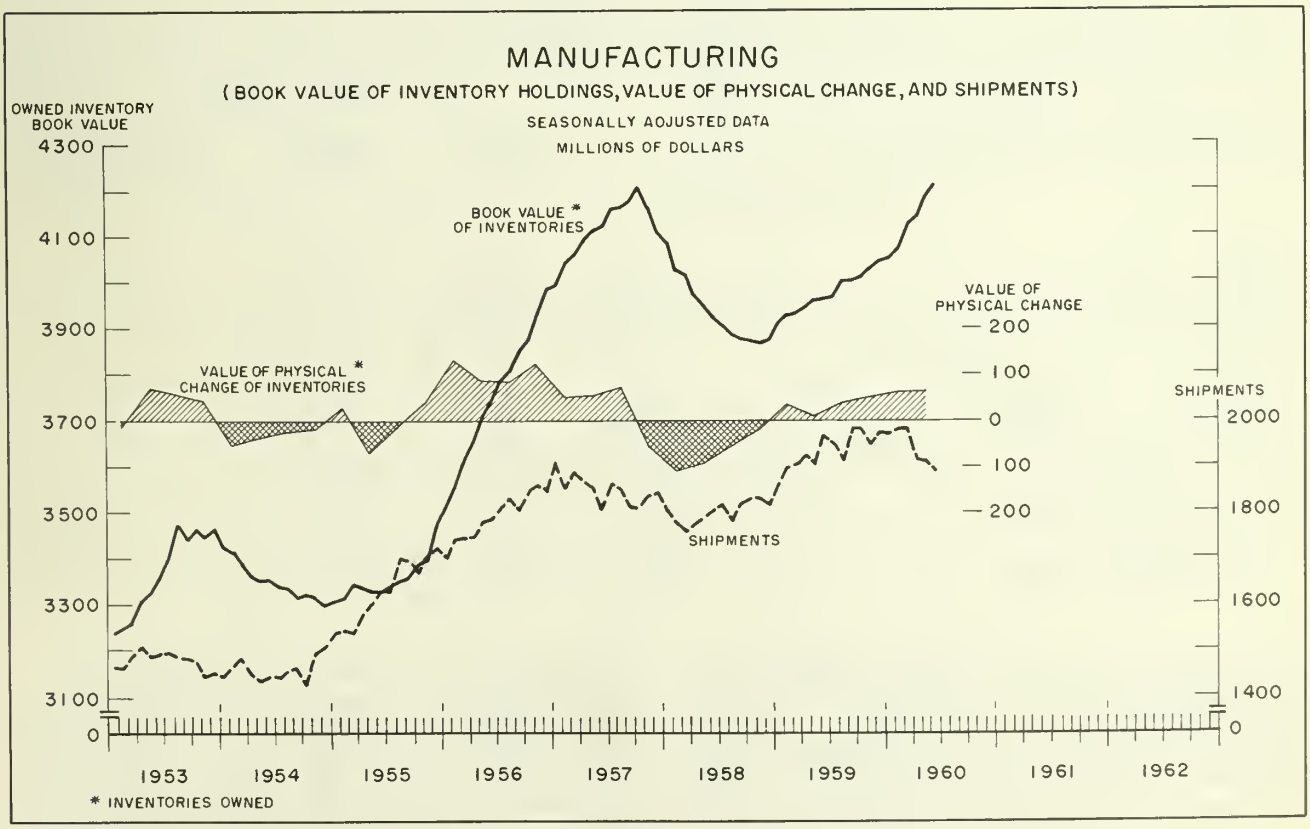

[1] Monthly data on starts refer to those in municipalities of 5,000 persons, or over.

**Change in Business Inventories**
(Seasonally adjusted at annual rates)

| | 4Q 1959 | 1Q 1960 | 2Q 1960 |
|---|---|---|---|
| | millions of dollars | | |
| Manufacturing | 208 | 256 | 268 |
| Durables | 168 | 84 | 252 |
| Non-durables | 40 | 172 | 16 |
| Retail trade | 40 | 228 | - 4 |
| Motor vehicle dealers | -112 | 92 | 128 |
| Other | 152 | 136 | -132 |
| Wholesale trade | 52 | 104 | 16 |
| Other industries | - 4 | 8 | — |
| **Totals** | **296** | **596** | **280** |

Manufacturers re-stocked at about the same rate as in the first quarter but the industrial pattern of stock-building changed. In the second quarter, unlike the first, the major part of the accumulation took place in the durable goods lines. All the durable goods industries, with the exception of transportation equipment, added to their inventories, the most pronounced build-up being in iron and steel. The non-ferrous metal and non-metallic minerals industries shifted from liquidation in the first quarter to accumulation in the second and in the former industry the shift was decidedly pronounced. Stocks were drawn down moderately in most of the non-durable lines.

Manufacturers' shipments, seasonally adjusted, have been on a declining trend since March. New orders declined in both the first and second quarters. At the same time, the book value of inventories owned has continued to rise in line with the trend which began early in 1959 (see Chart). The ratio of stocks to shipments in manufacturing rose sharply in the second quarter, to the highest level since early 1958.

In a situation of selective improvement in retail sales, retail trade dealers shifted from a fairly high rate of accumulation in the first quarter to slight liquidation in the second. This overall result was the outcome of a considerably reduced rate of build-up in the durable trades and a shift to liquidation in the non-durable trades. The rate of accumulation in the stocks of motor vehicle dealers was higher than in the first quarter. In most other durable trades stocks were drawn down, the liquidation being most pronounced in lumber and building materials, hardware, and farm implements. The shift to liquidation of stocks of non-durables took place largely in the miscellaneous trades and in apparel stores.

In wholesale trade the rate of accumulation fell sharply, the durable trades shifting from accumulation to liquidation and the non-durable trades sharply reducing their rate of accumulation.

### Exports and Imports of Goods and Services

Exports of goods and services, which had advanced sharply in the fourth quarter of 1959 and made further gains in the first quarter of 1960, receded in the second quarter. At a seasonally adjusted annual rate of $6.7 billions, they were down 7.5 per cent between the two quarters. At the same time, imports of goods and services declined moderately and at a seasonally adjusted annual rate of $8.1 billions were about 2½ per cent lower than in the first quarter. The consequence of these movements was a widening of the deficit on current international transactions from about $1.1 billion to $1.4 billion, in contrast to the narrowing that had been a feature of the trade imbalance in the two preceding quarters.

Movements in the merchandise account are primarily responsible for the recent widening of the deficit. Merchandise exports fell about 9.5 per cent, largely as a result of a steep decline in sales of agricultural products and non-ferrous metal products. Commodity imports also fell, but only by about 4 per cent. On the basis of two months' commodity detail available, it appears that the bulk of the decline in imports in the second quarter took place in iron and its products, associated in part with the fall-off in machinery and equipment investment.

The very substantial improvement in merchandise exports in the first half of 1960 reflected an especially strong first quarter. As has been noted, exports declined between the first and second quarters, seasonally adjusted, and were also lower on a year-to-year basis. The year-to-year drop of 3 per cent partly reflects the effect of developments in the second quarter of 1959, when merchandise exports showed an unusually sharp rise in June of that year. As has been pointed out previously, the July 1960 figures recovered strongly and were 8.7 per cent above a year ago. The accompanying tables show for leading commodities and leading countries the pattern of change between the two quarters.

**Domestic Exports**

| Leading commodities | Per cent change | | |
|---|---|---|---|
| | 1Q 1960 / 1Q 1959 | 2Q 1960 / 2Q 1959 | Half year 1960 / Half year 1959 |
| Newsprint paper | 16.9 | - 1.1 | 6.5 |
| Wheat | - 0.9 | -30.6 | -18.0 |
| Lumber and timber | 18.3 | - 4.5 | 4.9 |
| Wood pulp | 9.8 | 1.3 | 5.4 |
| Uranium ore | 7.0 | -21.7 | - 7.5 |
| Aluminum and products | 75.6 | 9.0 | 37.0 |
| Nickel | 88.1 | - 4.0 | 31.8 |
| Copper and products | 134.5 | 20.4 | 62.0 |
| Fish and fishing products | - 13.8 | - 6.0 | - 9.7 |
| Farm machinery and implements | - 16.2 | -29.7 | -23.4 |
| **Total domestic exports** | **22.9** | **- 2.9** | **8.4** |
| Leading countries | | | |
| United States | 18.3 | -10.1 | 2.1 |
| United Kingdom | 29.3 | 13.6 | 20.6 |
| European common market | 36.8 | 19.7 | 27.7 |
| Other | 28.7 | 1.7 | 13.5 |
| **Total domestic exports** | 22.9 | - 2.9 | 8.4 |

In the half-yearly comparison the overall increase in commodity exports of more than 8 per cent reflects conspicuously large gains in sales of aluminum, nickel and copper and substantial losses in sales of farm implements and machinery, wheat, fishery products, and uranium ores and concentrates. Considering trade in terms of leading countries, the pattern in the first half-year comparison was one of sharply expanded sales to the United Kingdom and countries of the European Common Market, and a somewhat higher level of sales to the United States.

Commodity imports, by contrast, show a fairly stable pattern between the two years. The slight increase of just over 2 per cent in the half-year occurred in the first quarter. With only 5 months' commodity detail available, automobiles and some other consumer goods and some industrial materials and equipment appear to account for the rise. Increases of 16 per cent in cotton products, 10 per cent in electrical apparatus, 9 per cent in automobiles, trucks and parts, and 7 per cent in machinery (other than agricultural), more than offset a drop of 9 per cent in imports of crude petroleum and 5 per cent in farm implements.

The exchange value of the Canadian dollar declined in the second quarter, by about 2½ per cent. Thus the price of imports of goods and services rose in the quarter. This in turn was reflected in an increase in the price component of gross available supply.[1] However, the price index of Gross National Product, which is adjusted for the effect of changing import prices, remained relatively unchanged. The price of exports also rose slightly in the quarter. With import prices up more sharply, there was, on balance, a slight deterioration in the terms of trade.

[1] Gross National Product (domestic production), plus imports.

**Changes in Income Components**

National income, seasonally adjusted, declined by 1½ per cent in the second quarter of 1960; labour income remained unchanged, corporation profits showed a sharp drop, and lower returns were recorded for other forms of investment income and unincorporated business operations. Net income of non-farm unincorporated business enterprises showed little change as a decline in the construction industry was offset by higher returns in retail trade, but net income of farm operators from farming operations was reduced in line with lower levels of livestock production. Rents, interest and miscellaneous investment income showed a small decline, reflecting a fall-off in the trading profits of government enterprises and lower returns from interest on investments.

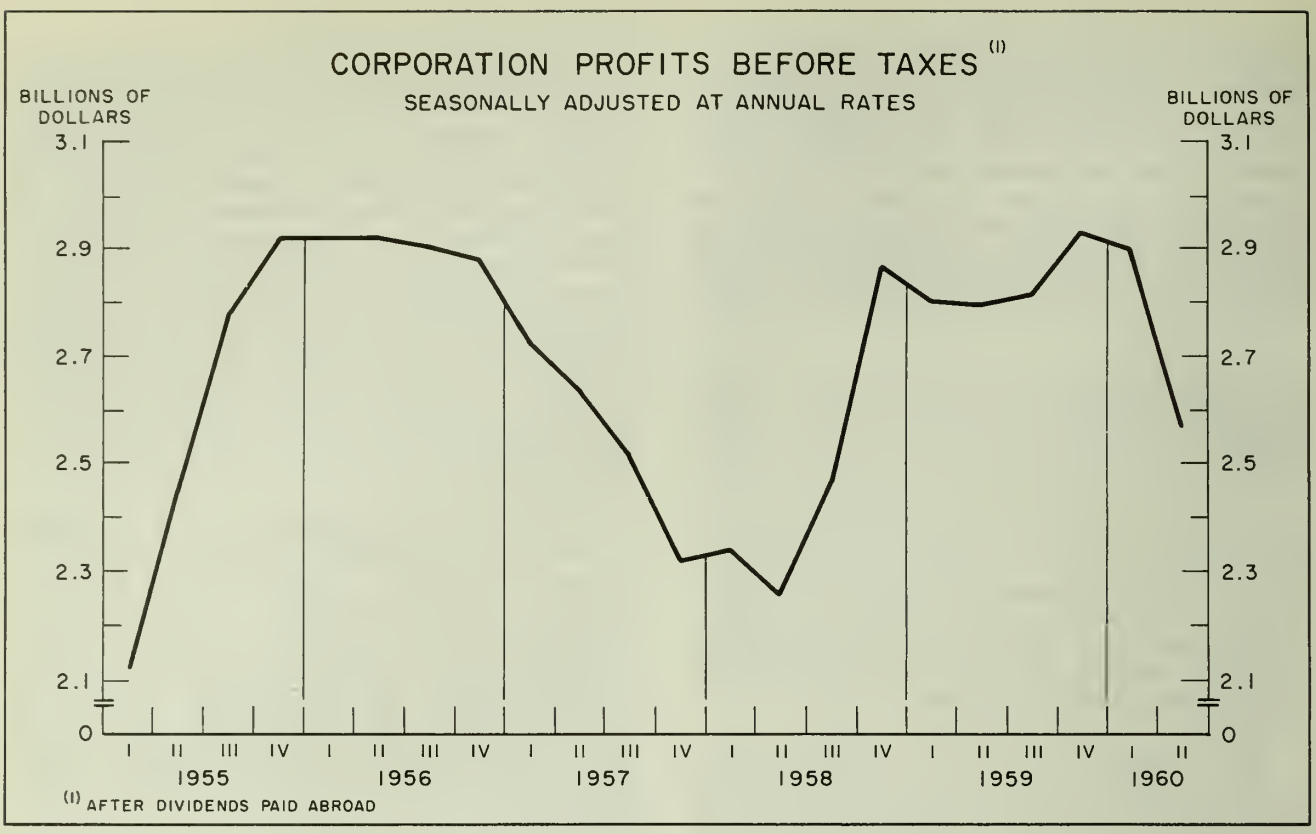

The stability in labour income in the second quarter reflected offsetting movements in income in individual industries. Labour income was considerably lower in forestry, somewhat lower in mining, construction, agriculture and manufacturing, somewhat higher in finance, insurance and real estate, trade and services and about the same in public utilities and transportation storage and communications. Some reduction in the length of the work week was a restraining influence on the advance of income in the mining and manufacturing industries.

For the first half of the year labour income was higher by more than 4 per cent, with gains in almost all major industries. Construction is a significant exception; income was down slightly. The largest gain (10 per cent) occurred in forestry, reflecting the distinct improvement in employment in this industry. The service industries continued to record relatively large gains and in trade the rise was also above average. In mining and manufacturing the gains were comparatively small. The factors affecting income in these industries are set out in the accompanying table.

**First Half 1960 over First Half 1959**

| | Per cent change | | | |
|---|---|---|---|---|
| | Employment | Hours worked per week | Average hourly earnings | Labour income |
| Manufacturing | -0.1 | -0.8 | 3.7 | 3.2 |
| Mining | -1.4 | 0.7 | 2.5 | 1.7 |

The decline of 11 per cent in seasonally adjusted corporation profits (excluding dividends paid abroad) in the second quarter of 1960 was one of the sharpest on record. Manufacturing profits declined by 11 per cent, associated with a drop of 3 per cent in manufacturing production during the quarter. Declines of over 20 per cent occurred in iron and steel products, electrical apparatus and supplies and wood products, with smaller losses in chemicals, textiles and printing, publishing and allied industries. Profits in foods and beverages, rubber, and paper sub-groups remained relatively unchanged from the previous quarter.

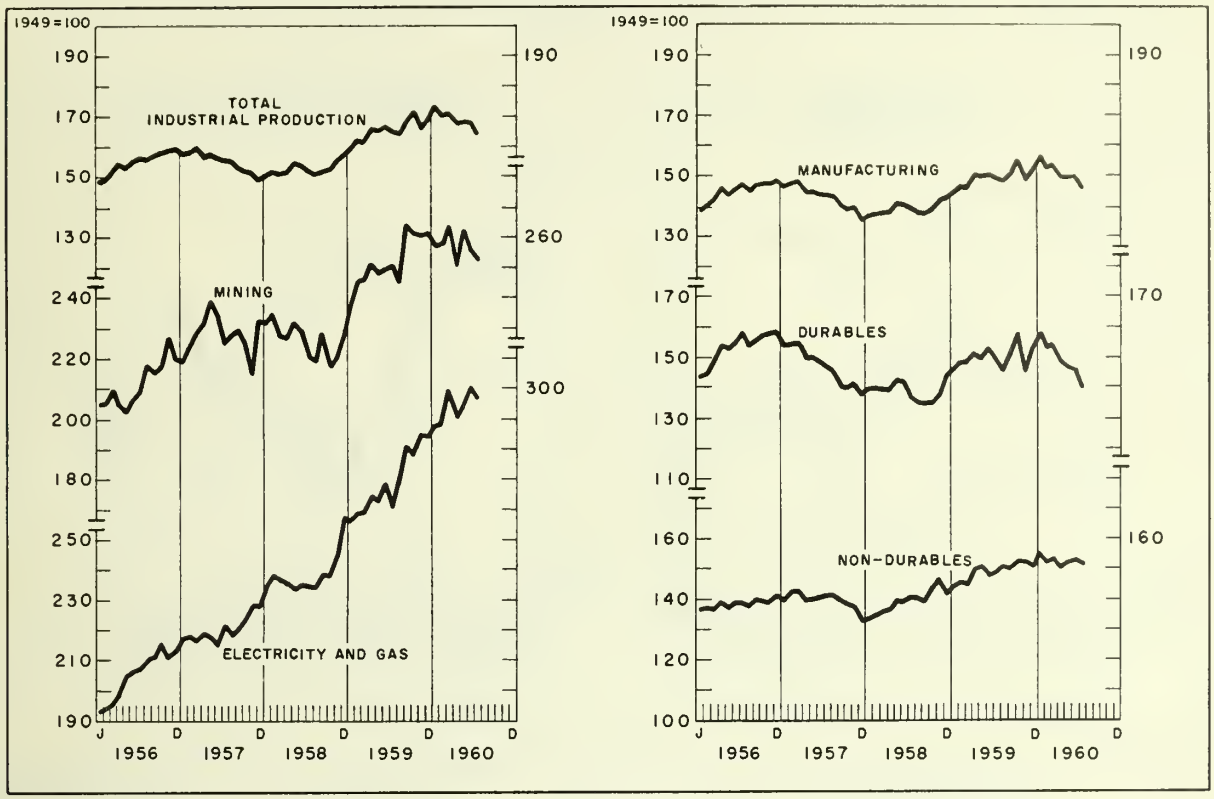

Other major industries in which sharp declines were registered during the quarter were transportation, storage and communication (-25 per cent), and wholesale trade (-22 per cent). Profits in retail trade, and finance, insurance and real estate were somewhat higher during the quarter.

The second quarter fall in total corporation profits is the first major set-back in this area since the recovery which began in 1958, following almost two years of steady decline. Taking the first six months of 1960 together, corporation profits are now about 2 per cent below the average for the first half of the year 1959.

## PRODUCTION*

The index of industrial production declined by 2 per cent in July, reflecting a drop in all three major component industries. The July fall-off brought the index to a level about 5 per cent below the peak at the beginning of the year.

| | | Gross National Product at Market Prices | | Total Industrial Production | Mining Production | Manufacturing Production | | | Electricity and Gas |

*A more detailed breakdown of Industrial Production, Seasonally Adjusted, can be found in Table 6.

[1]Averages or totals of unadjusted data. [2]Seasonally adjusted at annual rates. [3]Gross National Product at market prices excluding accrued net income of farm operators from farm production.

## EMPLOYMENT, EARNINGS AND HOURS WORKED*

The composite index of industrial employment edged downward in July, having moved irregularly within a narrow range for the past six months.

Average hours worked per week were higher in July, though the trend has been downward since the latter part of 1959; average hourly earnings were unchanged.

| | | Industrial Composite Employment [2] | Manufacturing [2] Total | Manufacturing [2] Durables | Manufacturing [2] Non-durables | Construction: Building and General Engineering [2] | Mining [2] | Manufacturing Average Weekly Wages and Salaries | Manufacturing Average Hourly Earnings | Average Hours Worked per Week in Manufacturing [2] Total | Durable Goods | Non-durable Goods |

[1]Averages of unadjusted data. [2]Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

Both the labour force and the total number of persons with jobs were higher in August. Persons without and jobs seeking work were also higher, amounting to 6.9 per cent of the labour force on a seasonally adjusted basis.

Total labour income remained unchanged in July.

[1]Averages of unadjusted data. [2]Percentage seasonally adjusted. [3]Revisions in the raw data for November, 1957 through June, 1958 are not incorporated in this series. [4]Series re-worked and therefore not comparable with previous series.

## RETAIL TRADE*

Retail trade declined by about 1.5 per cent in July, reflecting a decrease in sales of motor vehicle dealers and in most other components of retail trade.

*More detailed information on retail trade, Seasonally Adjusted, can be found in Table 46.

[1]Averages of unadjusted data. [2]Source: Sales of New Motor Vehicles and Motor Vehicle Financing. [3]Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

## CONSTRUCTION AND BUILDING PERMITS

Housing starts declined sharply in August, interrupting the upward trend of the previous four months. Completions rose following a three-month decline.

Commercial building permits declined in July for the fifth consecutive month.

*Seasonal adjustment computed by Central Mortgage and Housing Corporation.

## EXPORTS, IMPORTS AND MISCELLANEOUS SERIES

Exports declined in August from the July level, but were close to the average rate for the first quarter of the year.

Imports in August were somewhat above the July level, but below the average of both the first and second quarters.

| | | Value of Domestic Exports of Goods | Value of Imports of Goods | Carloadings of Revenue Freight: Total Revenue Cars Loaded | Carloadings of Revenue Freight: Grain and Grain Products | Carloadings of Revenue Freight: All other (ex Iron Ore) | Industrial Common Stocks | Corporation Profits before Taxes (1)(4) | Personal Disposable Income (1) | Farm Cash Income | Consumer Credit Outstanding (2)(3) |

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. (6)Average of weekly rates. (7)Revised according to new bench marks. (8)This total includes all generating agencies producing over ten million kilowatt hours per year. (9)End of period. Including personal savings deposits.

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.
[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

NOTE: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926-1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

Table 5.—NATIONAL ACCOUNTS: Income and Expenditure—concluded

YEARS AND QUARTERS

SOURCES OF PERSONAL INCOME

| | | Salaries, Wages and Supplementary Labour Income | Deduct: Employer and Employee Contributions to Social Insurance and Gov't. Pension Funds | Military Pay and Allowances | Net Income Received by Farm Operators from Farm Production[4] | Net Income of Non-Farm Unincorporated Business | Interest, Dividends and Net Rental Income of Persons | Transfer Payments to Persons | | Personal Income[2] |
|---|---|---|---|---|---|---|---|---|---|---|

(1)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. (2)Includes adjusting entry. (3)Includes residual error of estimate. (4)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. (5)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."** 9

[1]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

**Table 6.—INDUSTRIAL PRODUCTION—continued**

VOLUME INDEXES, 1949 = 100

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1]These totals include all generating agencies producing over ten million kilowatt hours per year. [2]These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3]Less imports. [4]Total net generation less net exports. [5]Mainly the amount used in electric boilers. **Source: Monthly Report, Electric Power Statistics, D.B.S.**

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

**Source: Monthly Report on Primary Iron and Steel—D.B.S.**

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]Includes some silvery pig iron formerly included with ferro-alloys. [2]Excluding shipments for processing. [3]Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings. [4]Monthly average. [5]Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]End of period. [2]Does not include apartment-type machines. [3]Electric and other. [4]Gas types are included. [5]In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis. **Source: New Residential Construction, D.B.S.**

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division, D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959, stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks. [7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958-31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

[1]As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. [2]Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products. **Source: Trade of Canada, D.B.S.**

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada.**

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1)Includes ,in addition to the industries listed, Agriculture, Forestry, Fishing and Construction. (2)Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries. (3)Includes Printing and Publishing and Allied Industries.

NOV 2 8 1960 DEC 1 1960 DEC 6 1960 DEC 7 1960

# *Canadian Agriculture . . . . . .*

**YESTERDAY** . . . . The Census of New France in 1667 recorded a population of 3,918 whites (668 families), having 11,448 arpents under cultivation with 3,107 cattle and 85 sheep.

**TODAY** . . . . The 1956 Census recorded a population of 16,080,791 and 3,711,500 families with 2,746,755 persons living on 575,015 farms having an area of 173,923,691 acres, and livestock population of 11,019,403 cattle, 784,018 horses, 4,732,799 pigs, 1,638,194 sheep and 73,160,368 poultry.

***Statistics on farming were essential to determine the progress of the young colony. Today agriculture is a far-reaching and complex industry and there is constant need for statistical data on its many phases.***

**DBS** conducts 5- and 10-year censuses of agriculture which provide a detailed picture of the development of the industry.

**DBS** publishes a wide range of current information on production, value and disposition of field and special crops, livestock, dairying, fur farms; and on farm cash and net income, farm wages and prices of agricultural products.

**DBS** data on agriculture are essential to planning in the industry and in many other fields and are used extensively by governments, farmers and farm organizations, food packers and processors, storage warehouses, wholesalers and retailers, transportation services, consumers, exporters and importers, manufacturers of farm implements and fertilizers, banks and other lending agencies.

*A complete list of DBS publications is contained in the* Catalogue of Current Publications. *Write for a free copy to: Information Services Division, Dominion Bureau of Statistics.*

ROGER DUHAMEL, F.R.S.C. Queen's Printer and Controller of Stationery, Ottawa, 1960

# THE DEVELOPMENT OF CONSUMER CREDIT STATISTICS IN CANADA

Available statistics on consumer credit emanate from various D.B.S. surveys and the records of certain other government departments. Balances outstanding (in most cases at the month-end and calendar-year-end) on account of transactions mainly of the nature of consumer credit are published monthly in the Bank of Canada *Statistical Summary*. In the case of the so-called sales finance companies repayments and new paper purchased are also shown. Publications of the Dominion Bureau of Statistics carry most of this information in greater detail.

A problem in the production of comprehensive consumer credit statistics is to define the phrase "consumer credit". The usual definition would probably include any indebtedness which has been contracted for the purpose of purchasing consumer goods or services for personal use.[1] In many cases, however, the purpose of the loan is not really known; it is merely inferred from the type of borrower; for example, policy loans and bank loans contracted by persons maybe classified with consumer credit because it is assumed that the proceeds are used to finance personal purchases, although in fact they may be used to finance business transactions. In other cases, the indebtedness is contracted in the course of actual purchases of goods which are apparently consumer goods but it is by no means certain that they are intended for personal rather than business use.

One of the most important surveys in this latter category is carried out by the D.B.S. in the field of retail trade. In 1941 a temporary wartime agency began collection, on a restricted basis, of credit extended by a small sample of retail stores. The D.B.S. took over this sample after the War and enlarged it until in 1949 it included some 2,500 stores in 16 different trades. Separate statistics were collected, annually and quarterly, on credit sales and accounts receivable, each subdivided into instalment and charge account. In 1955 a larger and much improved sample was designed subdividing the field into three main classes (with subdivisions in each): (a) department stores, (b) chain stores in credit trades[2] and (c) independent stores in credit trades. As a result of vexing difficulties in defining and reporting credit sales the quarterly survey was recently reduced in scope to cover accounts receivable only. A monthly series covering certain trades was added. The annual survey continues to secure credit sales as well as receivables.

Another major DBS survey in this field covers the activities of sales finance companies. This survey had its origins in 1935 in a monthly survey which was confined to new motor vehicle sales and the financing of these vehicles by sales finance companies. After commencement of this survey there was evidence of increasing interest in the total activities of sales finance companies. Such a survey was started in 1941 but was discontinued the following year until 1948, when it was resumed on a regular basis, first as an annual survey only but later also on a quarterly and more recently on a monthly basis. This monthly survey covers 15 of the largest companies accounting for some 90 per cent of the total business. The monthly estimates are adjusted once a year to the annual totals which cover all Sales Finance Companies (except those which are subsidiary to a merchandising organization financing only the sales of that organization). Indebtedness incurred for the purchase of consumer goods is shown separately from that incurred for the purchase of commercial and industrial goods. In each of these major categories separate data are shown for motor vehicles[3] and "other goods".[4] In addition to balances outstanding, the amount of paper purchased is collected and repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased.[5] (The figures on repayments therefore include cancellations and any other adjustments to the two reported series).

The other sources of information on consumer credit may be summarized briefly:

### (a) Small loan companies and licensed money lenders

An annual report of the Department of Insurance on small loan companies and licensed money lenders shows considerable detail of each company's yearly business, including accounts outstanding at the end of the year. Monthly surveys are carried out by D.B.S. on balances outstanding at the end of each month.

### (b) Chartered banks

The chartered banks provide quarterly data on secured and unsecured loans to persons, and home improvement loans to persons. (Loans to finance the purchase of Canada Savings Bonds are also supplied but these are excluded from the consumer data tables.)

### (c) Credit unions

The annual data secured from credit unions show only total loans, with no other details.

---

[1] Mortgage debt on houses would, presumably, be included only if it was used to finance consumer purchases.

[2] For example, food, chains and variety stores which do not sell for credit were excluded. Sales in all non-credit trades were classified as cash sales and added to the cash sales of credit stores.

[3] All passenger cars are classified as consumer.

[4] Other goods are further broken down into a variety of classes for those respondents who can provide the detail.

[5] In addition, data on average repayment terms on retail paper purchased are collected.

**(d) Life insurance companies**

Complete data are available annually on policy loans from the Department of Insurance. Monthly data for 12 large companies are used in conjunction with the annual data to provide monthly estimates of policy loans outstanding.

**(e) Quebec savings banks**

Monthly data on the loans outstanding of Quebec savings banks are available as part of their published material.

**(f) Miscellaneous**

Annual surveys were initiated in 1958 by the D.B.S. on credit extended to individuals by utility and transportation companies. At present it appears that these companies cannot supply information on a more frequent basis. Quarterly surveys of oil company credit to individuals have been carried out for some years.

Credit statistics not available may also be briefly listed:

**(a) Service credit**

Very little is known about credit extended by professional people such as doctors and dentists, by hotels, and credit card companies. The last two fields, however, are under study at the present time.

**(b) Individual loans**

Very little is known about loans by individuals to individuals and no special surveys are being planned.

A number of outstanding problems in the preparation of a comprehensive set of consumer credit statistics may be outlined briefly:

(a) As already indicated, a portion of the credit classified as consumer credit is probably used for business rather than for personal purposes. A practical but incomplete way of reducing this problem is by publishing separate data for the different trades so that those in which business credit is likely to be unimportant can be studied separately. Examples of retail trade in which business credit is important are implement, fuel, and hardware. In addition, charge accounts of motor vehicle dealers are classified as business for purposes of analysis by the Bank of Canada.

(b) New developments in the field of credit are continuously taking place making it more difficult to maintain meaningful historical series. For example, in the past few years additional chartered banks have entered the sales finance field so that the data obtained from sales finance companies provide a decreasing proportion of the available credit paper. Another development impairing comparability is the appearance of credit card companies in several areas of Canada. These companies discount the receivables of retailers; the retailers receive cash (discounted) and the credit card companies assume all risk of collections. Thus some concerns which formerly carried receivables on their own books do not have them now as the receivables are on the books of the credit card companies.[6] As already intimated, it is planned to start a survey of these companies in the near future.

(c) The historical information is complicated further by changes in the terms on which credit is granted. Large stores, especially department stores, have started combining recently their different credit accounts into a single "all-purpose" credit plan. At the time of billing they do not know if the customer is planning to pay the amount outstanding in one lump sum or spread it over a number of months. Under the new arrangement customers are billed and a service charge made each month which is based on the unpaid portion of the account, replacing the instalment contract (widely used in the past) where the carrying charges are added after the time of repayment has been agreed upon (usually at the date of purchase). This development is becoming quite widespread and the breakdown between charge and instalment hitherto collected may be eliminated in the near future. Thus the annual data in the future will be classified into cash sales and credit sales and the monthly and annual data will show a single total only covering all receivables.

(d) As mentioned earlier, the breakdown of sales between cash and credit has been eliminated from the quarterly and monthly data mainly because firms had continuous difficulty in treating down payments and trade-in allowances and it was felt that the resources involved in straightening out these problems in the current surveys were better employed elsewhere.

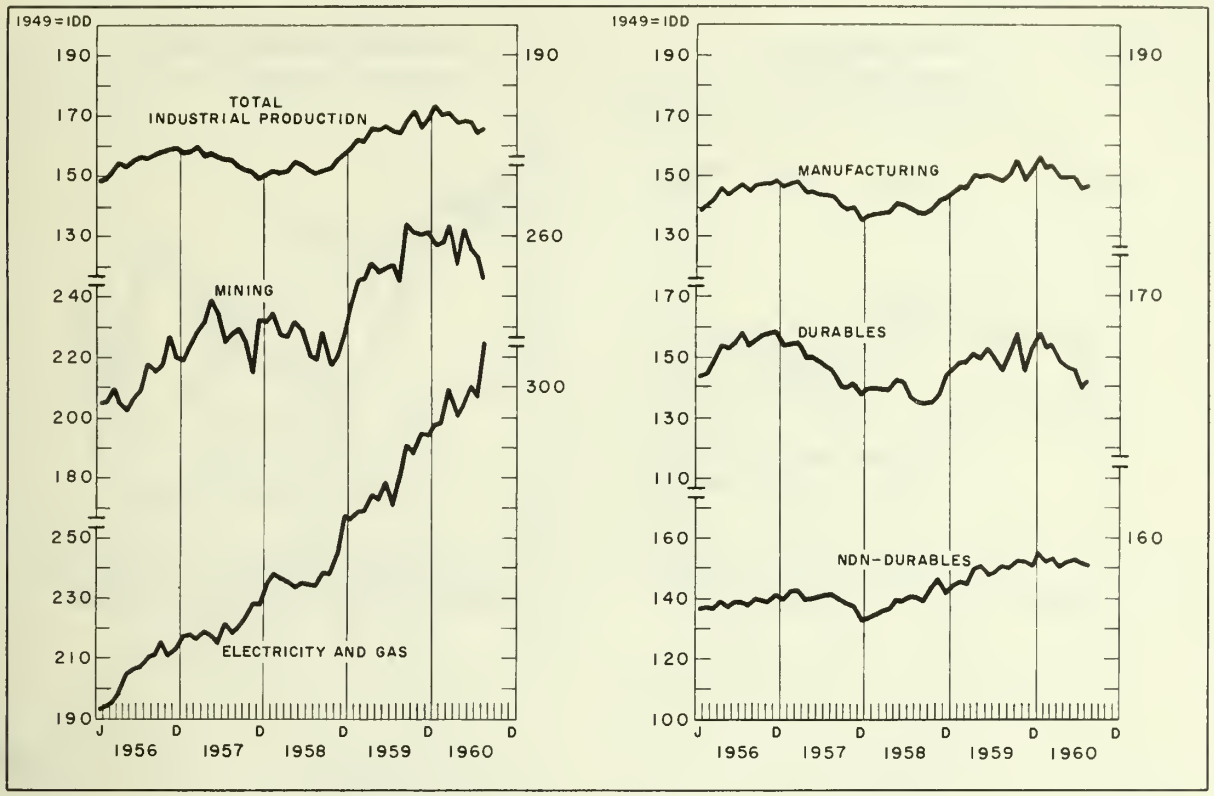

(e) Except for instalment finance companies, only amounts outstanding at the end of the period are collected at the present time with no information available currently on new loans and repayments. For analytical purposes it is of course very useful to have separate information on new loans and repayments as well. The possibility of obtaining such information on a current basis will probably be studied shortly by the interdepartmental committee referred to at the beginning of this memorandum.

---

[6] The figures of receivables shown in the reports of retail dealers exclude the amount of paper sold to sales finance companies.

## PRODUCTION*

The index of industrial production rose slightly in August, as gains in manufacturing and in electricity and gas offset a decline in mining. Despite the August advance, the index was at a level about 4 per cent below the beginning of the year.

| | | Gross National Product at Market Prices | | Total Industrial Production | Mining Production | Manufacturing Production | | | Electricity and Gas |

*A more detailed breakdown of Industrial Production, Seasonally Adjusted, can be found in Table 6.

[1]Averages or totals of unadjusted data. [2]Seasonally adjusted at annual rates. [3]Gross National Product at market prices excluding accrued net income of farm operators from farm production.

## EMPLOYMENT, EARNINGS AND HOURS WORKED*

The composite index of industrial employment was unchanged in August.

Average hours worked per week declined in August, but average hourly earnings remained unchanged.

| | | Industrial Composite Employment (2) | Manufacturing (2) | | | Construction: Building and General Engineering (2) | Mining (2) | Manufacturing | | Average Hours Worked per Week in Manufacturing (2) | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Total | Durables | Non-durables | | | Average Weekly Wages and Salaries | Average Hourly Earnings | Total | Durable Goods | Non-durable Goods |
| | | 1949=100 | | | | | | Dollars | | | | |
| 1958 (1) | | 117.9 | 109.8 | 114.8 | 105.6 | 127.6 | 123.5 | 72.67 | 1.66 | 40.2 | 40.3 | 40.1 |

(1) Averages of unadjusted data. (2) Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

Total employment rose slightly in September. Unemployment declined, and with the labour force remaining relatively unchanged, unemployment as a percentage of the labour force also declined.

Total labour income rose slightly in August, although labour income in manufacturing was unchanged.

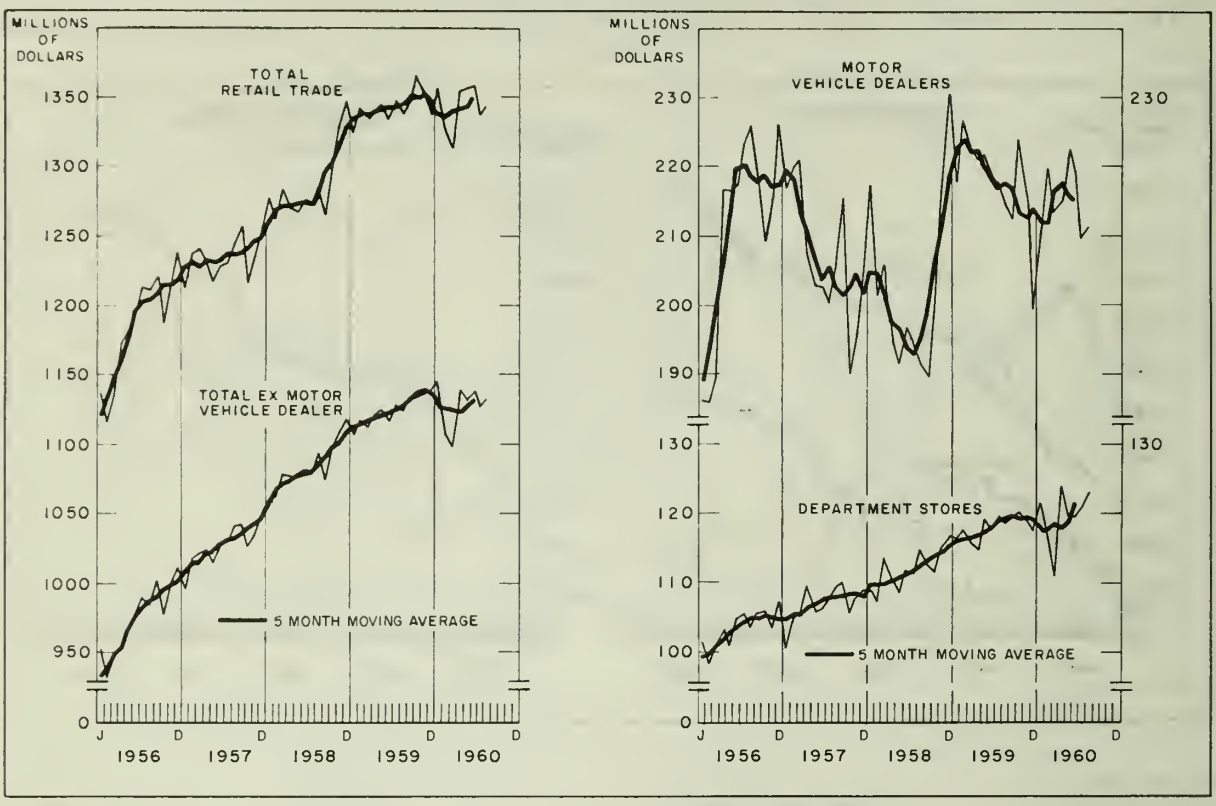

| | | Civilian Labour Force[3] | | | | | | Labour Income | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | Employed | | | | | |
| | | Total | Non-Agricultural | Total | Non-Agricultural | Index of Unemployed | Unemployed as a per cent of Labour Force[2] | Total | Manufacturing |

[1]Averages of unadjusted data. [2]Percentage seasonally adjusted. [3]The data printed here are revised in accordance with the new definitions of "employment" and "unemployment" which came into effect in the September, 1960 issue of *The Labour Force*. The series "Paid Workers Non-Agricultural" carried in previous issues is temporarily discontinued on the seasonally adjusted basis.

## RETAIL TRADE*

Total retail trade was higher in August, reflecting increases in most store types. The July and August average, however, was below that of the second quarter.

| | | Retail Trade Total | Retail Trade (ex motor vehicle dealers) | Motor Vehicle Dealers[3] | New Passenger Car Sales[2] | Commercial Vehicle Sales[2] | Department Stores | Grocery and Combination Stores | Furniture plus Radio and Appliances |

*More detailed information on retail trade, Seasonally Adjusted, can be found in Table 46.

[1]Averages of unadjusted data. [2]Source: Sales of New Motor Vehicles and Motor Vehicle Financing. [3]Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

## CONSTRUCTION AND BUILDING PERMITS

Both housing starts and completions were higher in September. Third quarter total starts were well above the second quarter average, but total completions showed little change.

Commercial building permits declined for the sixth consecutive month.

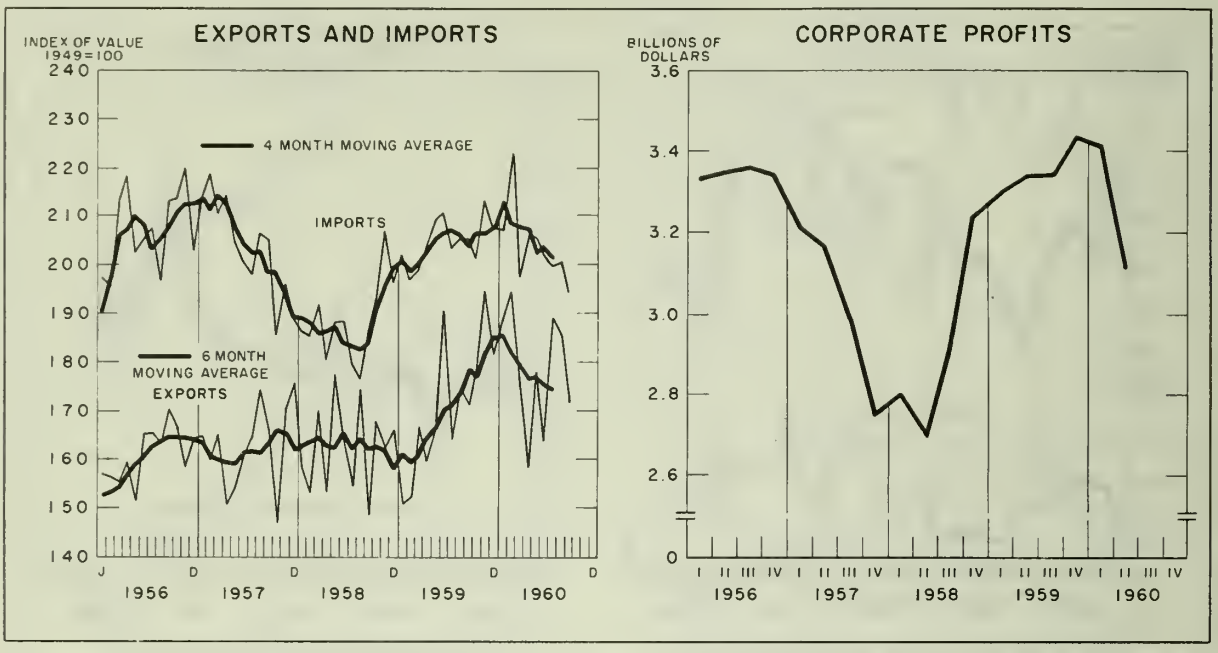

| | | New Residential Construction in Canada*(2) | | | | Value of Building Permits | | | |

*Seasonal adjustment computed by Central Mortgage and Housing Corporation.

## EXPORTS, IMPORTS AND MISCELLANEOUS SERIES

Exports in September were lower, though the third quarter average was well above that of the second quarter. September imports also declined, and the third quarter average was somewhat below that of the second quarter.

| | | Value of Domestic Exports of Goods | Value of Imports of Goods | Carloadings of Revenue Freight: Total Revenue Cars Loaded | Carloadings of Revenue Freight: Grain and Grain Products | Carloadings of Revenue Freight: All other (ex Iron Ore) | Industrial Common Stocks | Corporation Profits before Taxes (1)(4) | Personal Disposable Income (1) | Farm Cash Income | Consumer Credit Outstanding (2)(3) |

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. (6)Average of weekly rates. (7)Revised according to new bench marks. (8)This total includes all generating agencies producing over ten million kilowatt hours per year. (9)End of period. Including personal savings deposits.

(1)"De facto" population. Annual data are for June. (2)At current market prices. Annual data are totals of the four quarters. (3)Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4)All manufactured products. (5)Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates. (6)Annual data are for June.

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

NOTE: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926–1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

(1)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. (2)Includes adjusting entry. (3)Includes residual error of estimate. (4)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. (5)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."** 9

[1]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1]The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. [2]The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1). **Source: Labour Gazette, Department of Labour.**

[1]These totals include all generating agencies producing over ten million kilowatt hours per year. [2]These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3]Less imports. [4]Total net generation less net exports. [5]Mainly the amount used in electric boilers. **Source: Monthly Report, Electric Power Statistics, D.B.S.**

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]Includes some silvery pig iron formerly included with ferro-alloys. [2]Excluding shipments for processing. [3]Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings. [4]Monthly average. [5]Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]End of period. [2]Does not include apartment-type machines. [3]Electric and other. [4]Gas types are included. [5]In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. **Source: Monthly Reports, Domestic Electric Refrigerators, Domestic Washing Machines, Trade of Canada, and Radio and Television Receiving Sets, D.B.S.**

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis. **Source: New Residential Construction, D.B.S.**

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division, D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959, stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks. [7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958-31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

[1]As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. [2]Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products. **Source: Trade of Canada, D.B.S.**

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada**

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1)Includes ,in addition to the industries listed, Agriculture, Forestry, Fishing and Construction. (2)Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries. (3)Includes Printing and Publishing and Allied Industries.

# CANADA 1960...

- Special feature articles
- Profusely illustrated
- Over 300 pages

CANADA 1960 embraces surveys depicting the nation's natural resources, its industrial development, domestic and international trade, transportation, the labour force, social, educational and cultural life, plus . . .

. . . *a panoramic description of the development of the nation's economy during the first 60 years of the 20th Century* . . .

. . . *a historical-geographical study of Canada's growth from colony to nation* . . .

**$1 Per Copy**

Copies of *Canada 1960* are available from both the Dominion Bureau of Statistics and the Queen's Printer, Ottawa. Orders should be accompanied by postal money order or cheque made payable to the Receiver General of Canada.

## CANADIAN FINANCIAL STATISTICS

Until recently there has been no central co-ordination of financial statistics in Canada. Whereas the Dominion Bureau of Statistics is the central federal statistical agency for the collection of statistics in many fields such as prices, employment, agriculture, manufacturing, international trade, education, health and welfare, the responsibility for the production of financial statistics has been divided among a number of government departments and agencies. For example, the Department of Finance publishes statistics on various aspects of the financial operations of the Federal Government. The Department of Insurance collects statistics on life and other insurance companies, small loan companies and certain trust and loan companies; the Department of Agriculture obtains data on credit unions; the Department of National Revenue collects balance sheet and other data from business; the Central Mortgage and Housing Corporation prepares estimates on the financing of new residential construction; the Bank of Canada produces a large volume of financial statistics, pertaining mainly to banking and the securities and foreign exchange markets; and the Dominion Bureau of Statistics obtains figures on the capital account of the balance of payments, consumer credit, pension plans and provincial and municipal finance. The statistics which these various agencies produce are in most cases designed to provide them with information which they need for discharging their specific administrative responsibilities. They have not been developed within any overall framework and consequently are difficult to fit together for financial and economic analysis.

Perhaps more serious is the fact that there are important areas where statistics are either lacking or inadequate; in others, where the coverage may be good and classification reasonably adequate, the time lags involved in collection and publication are so great as to make the figures of limited usefulness for current analysis. As far as their own responsibilities are concerned, the various administrative agencies have, in general, not felt any particular need for improving or speeding up the statistical information they have been collecting in these areas.

The lack of an adequate coverage of financial statistics is by no means a situation unique to Canada. However, in a number of other countries considerable progress is now being made in the development of this field.

In view of the demand for better financial statistics, not only for studying financial developments but also for their usefulness in economic analysis generally it seemed desirable to set up an informal interdepartmental committee on financial statistics. The Committee, which started its work in the Spring of 1959, was given the responsibility for reviewing the state of financial statistics and making recommendations on what action might be taken to bring about improvements. It is composed of representatives of the Department of Finance, the Department of Trade and Commerce, the Bank of Canada, the Central Mortgage and Housing Corporation and the Dominion Bureau of Statistics.

The Committee had available to it the results of substantial investigation and reworking of financial statistics in Canada which had been undertaken in connection with two major projects, namely, the "direct" estimates of personal saving (in which personal saving was estimated by subtracting changes in personal liabilities from changes in personal assets); and, more important, the so-called National Transactions Accounts. The former project had been undertaken by the Bank of Canada, in cooperation with the Dominion Bureau of Statistics, and culminated in its publication in the *Statistical Summary* of the Bank of Canada; publication was discontinued mainly because of weakness in some of the underlying statistics. The National Transactions Account had been constructed for the years 1946 to 1954 for the Royal Commission on Canada's Economic Prospects to provide a statistical description of post-war capital markets in Canada.

The National Transactions Accounts represented a most useful standard classification system for the development of meaningful financial statistics which would be consistent internally as well as with available national income aggregates. It was agreed that the focal point of the Committee's efforts should be to fill in the gaps which would make it possible to answer important practical questions, such as, for example, how capital investment is financed.

The available information was examined from this point of view and it was concluded that the most serious gap is the lack of current balance sheet data of non-financial corporations. The only corporate balance sheet information now available appears in *Taxation Statistics*, published by the Department of National Revenue, which, while very useful, is inevitably late in preparation and not entirely satisfactory in classification. As a result there is inadequate current knowledge about changes in corporate liquidity or about the activities of the corporate sector in financial markets. Accordingly, it was decided to initiate a quarterly survey of corporate assets and liabilities, beginning with non-financial corporations. Pilot surveys have been carried out this year to test public reaction to the contemplated questionnaire. The results of these surveys indicated that quarterly surveys on a regular basis would be feasible.

Meanwhile, statistics available from financial institutions had been studied and it appeared evident that, with some exceptions, particularly the banks, current balance sheet information was lacking; and while in most cases the annual information was adequate it was much too late in coming out. The

banking system is reasonably well documented on an up-to-date basis although there are a number of problems. Most of the other financial intermediaries are pretty well covered on an annual basis but, except for a monthly sample of life insurance assets, and some quarterly data on instalment and other finance companies, there is little information on a current basis. While the annual information for insurance and trust and loan companies is fairly good it is very late in becoming available. In some cases little use has been made of the available data owing mainly to the fact that the information has not been organized in the most useful form for financial analysis.

In the light of the above, a draft questionnaire designed to cover, on a quarterly basis, trust, loan, investment certificate companies, instalment and other finance companies has been prepared and is at present being studied. It is also planned to consider in the near future what the best method may be for improving the information on other financial intermediaries.

Turning to the government sector, there is a good deal of information available on Government of Canada transactions on a current basis but much work is necessary to obtain statistics that can be used in conjunction with those of other sectors of the economy. Sources of information on provincial and municipal finances are much less adequate and little is available on a current basis. In the important field of government-owned enterprises — which account for over 10 per cent of total fixed capital formation — information on either an annual or quarterly basis is quite inadequate. Resources have recently been secured to strengthen the statistics, including balance sheet information, of government enterprises and provincial and municipal governments.

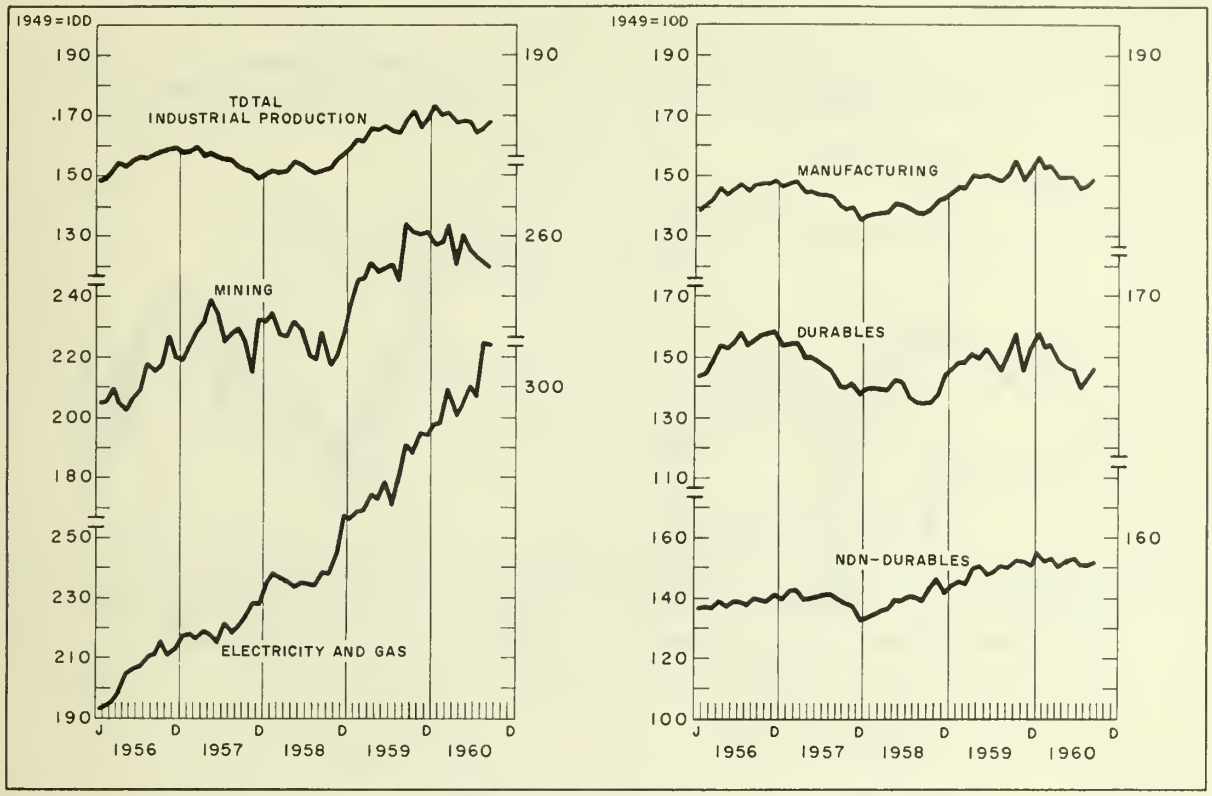

Another field which is being studied is that of mortgage finance. A large proportion of total mortgage instruments are held by financial institutions which publish annual or more frequent reports, and projectors based on mortgage registrations and direct surveys are used to obtain up-to-date estimates. However, information on mortgages held by persons, unincorporated business and non-profit institutions is very scanty and poor. It is believed that one-third of total mortgage debt outstanding is held by these sectors. Accordingly the possibility of improving the information in this area is being studied.

While no attempt is being made at present to produce up-to-date tables along the lines of the National Transactions Account, the filling of the gaps listed above will go a long way towards rendering feasible the regular production of such tables. Not only will information become available which is in itself directly useful but, in addition, estimation as residuals of certain components which are difficult to secure directly through surveys, for example the holding of financial assets by persons will be rendered more practicable.

However, regular publication of an up-to-date National Transactions Account will, in addition, involve solution of certain technical and conceptual problems which at the moment are receiving marginal attention only. For a detailed description of these problems and the National Transactions Account reference may be made to Wm. C. Hood, *Financing Economic Activity in Canada*, Royal Commission on Canada's Economic Prospects (Ottawa 1958) Part VI; and for a summary of the issues John A. Sawyer and Frank W. Emmerson "Estimates of Saving Prepared from Financial Transactions Accounts in Canada" paper presented to the Sixth Conference of the International Association for Research in Income and Wealth.

## PRODUCTION*

The index of industrial production rose moderately in September. There was a noticeable increase in total manufacturing production, and particularly in the durables category. Electricity and gas and mining changed little.

| | | Gross National Product at Market Prices | | Total Industrial Production | Mining Production | Manufacturing Production | | | Electricity and Gas |

*A more detailed breakdown of Industrial Production, Seasonally Adjusted, can be found in Table 6.

[1]Averages or totals of unadjusted data. [2]Seasonally adjusted at annual rates. [3]Gross National Product at market prices excluding accrued net income of farm operators from farm production.

## EMPLOYMENT, EARNINGS AND HOURS WORKED*

The composite index of industrial employment declined slightly in September. Employment in manufacturing and construction was down but in mining there was a noticeable increase.

Average hours worked and average hourly earnings in manufacturing rose slightly in September.

| | | Industrial Composite Employment [2] | Manufacturing[2] Total | Manufacturing[2] Durables | Manufacturing[2] Non-durables | Construction: Building and General Engineering[2] | Mining [2] | Manufacturing Average Weekly Wages and Salaries | Manufacturing Average Hourly Earnings | Average Hours Worked per Week in Manufacturing[2] Total | Durable Goods | Non-durable Goods |

[1]Averages of unadjusted data. [2]Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

Total employment rose in October for the fourth straight month. Unemployment amounted to 7.6 per cent of the total labour force.

Total labour income increased in September but labour income in manufacturing was about unchanged.

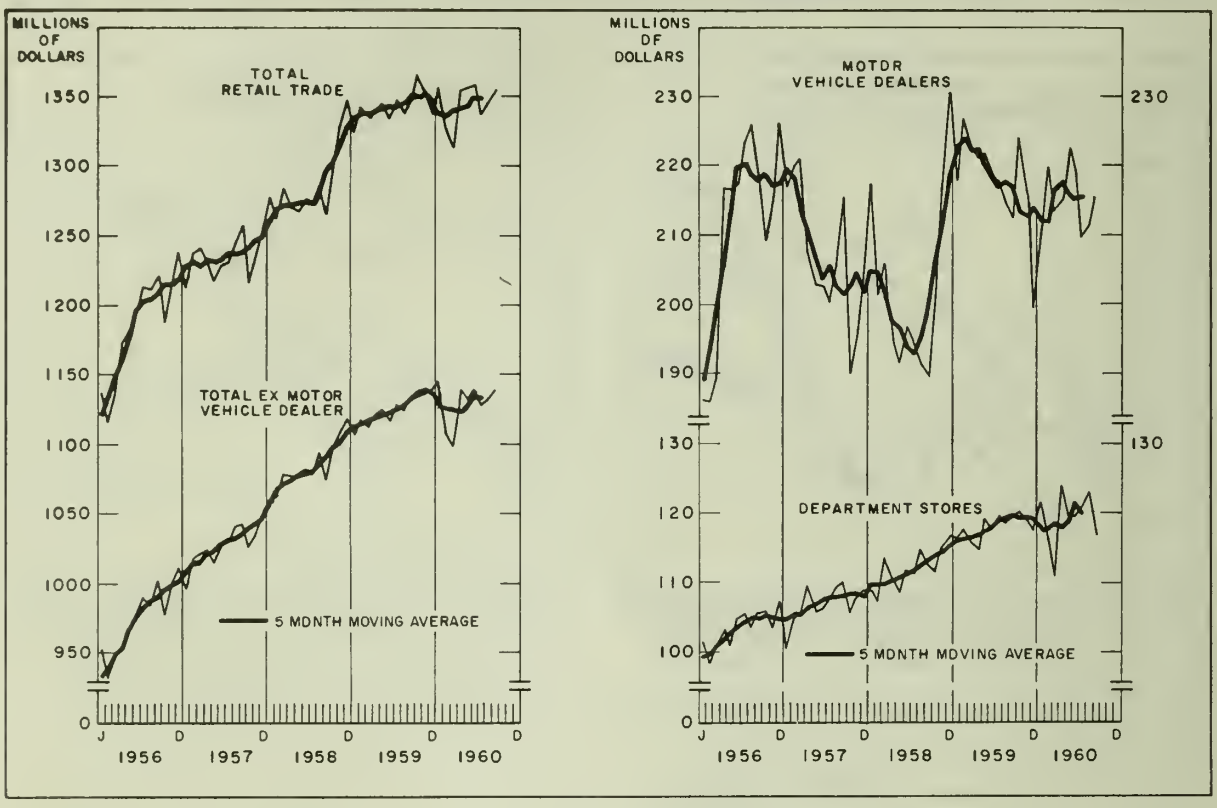

| | | Civilian Labour Force[3] | | | | | | Labour Income | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | Employed | | | | | |

[1]Averages of unadjusted data. [2]Percentage seasonally adjusted. [3]The data printed here are revised in accordance with the new definitions of "employment" and "unemployment" which came into effect in the September, 1960 issue of *The Labour Force*. The series "Paid Workers Non-Agricultural" carried in previous issues is temporarily discontinued on the seasonally adjusted basis.

## RETAIL TRADE*

Total retail trade increased in September. There were gains in most of the store types but department store sales decreased.

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

[1]The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. [2]Includes adjusting entry. [3]Includes residual error of estimate. [4]This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. [5]Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."**

(1)The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

Table 6.—INDUSTRIAL PRODUCTION—continued

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1]The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. [2]The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1). **Source: Labour Gazette, Department of Labour.**

[1]These totals include all generating agencies producing over ten million kilowatt hours per year. [2]These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3]Less imports. [4]Total net generation less net exports. [5]Mainly the amount used in electric boilers. **Source: Monthly Report, Electric Power Statistics, D.B.S.**

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]End of period. [2]Does not include apartment-type machines. [3]Electric and other. [4]Gas types are included. [5]In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis. **Source: New Residential Construction, D.B.S.**

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division, D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959, stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks. [7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958-31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

[1]As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. [2]Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products. **Source: Trade of Canada, D.B.S.**

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada.**

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1)Includes ,in addition to the industries listed, Agriculture, Forestry, Fishing and Construction. (2)Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries. (3)Includes Printing and Publishing and Allied Industries.

# NATIONAL ACCOUNTS – INCOME AND EXPENDITURE

## THIRD QUARTER 1960

### Introductory Review

Gross National Product, seasonally adjusted, showed a fractional advance in the third quarter, amounting to less than one-half of 1 per cent. This most recent development follows the modest drop in output in the second quarter of this year, when Gross National Product declined by 1½ per cent. About half of the slight gain in the value of production in the third quarter was accounted for by a small change in final product prices; in volume terms, the Gross National Product was very close to being unchanged from the level of the second quarter. Overall employment between the two quarters also remained unchanged.

The partial recovery in the level of activity, from a situation of declining production to a position of approximate stability, reflects developments in both external and domestic demand. On the external side, exports of goods and services rose very sharply in the third quarter, following the rather sudden decline which had characterized the figures for the second quarter of this year. The increase in the third quarter was concentrated in our trade with European and other overseas countries; exports to the United States have shown little change, after allowing for seasonal factors, reflecting the lower levels of economic activity which have recently emerged in that country.

Final domestic demand has also contributed to the somewhat firmer tone that is suggested by the figures for the third quarter. (See accompanying table, line 8). Both housing and non-residential construction outlays were higher in the third quarter, following two quarters of successive declines. The reversal in outlays for new housing reflected in large part the resumption of direct Central Mortgage and Housing Corporation lending in April of this year, and the increase in lending activity under the National Housing Act of life insurance, and loan and trust companies in August and September; the rate of housing starts, seasonally adjusted, rose by 18 per cent in the third quarter. The up-turn in non-residential construction was relatively modest, and had been anticipated to some extent by the increase in industrial building permits which was noted in the second quarter; outlays for new machinery and equipment, however, continued to decline. Government expenditure on goods and services was also an important factor in the recovery of final domestic demand in the third quarter. Higher outlays for investment at all levels of government, and increased wages and salaries paid by the Federal government were factors contributing to this development. Consumer expenditure, however, remained virtually unchanged in the third quarter as outlays for durables continued to decline, and relatively small gains were made in outlays for non-durables.

Taken together, the renewed strength in exports and in final domestic demand in the third quarter produced a sizable advance in total final purchases of goods and services (see accompanying table, line 7). The upswing in these final demand categories was not transmitted to production, however, since the bulk of these requirements were met, on balance, by cut-backs in the inventory sector. Inventory stocks, which were still accumulating in the second quarter, were drawn down considerably in the third quarter. In terms of new demands on production, the downward pressures exerted by this swing in the inventory sector amounted to close to $0.6 billion. Developments in the inventory sector thus acted as a brake upon production in the third quarter and largely offset the increases which occurred in major components of final domestic and export demand.

Turning to developments on the income side, all major components of National Income showed relatively greater strength in the third quarter; National Income as a whole showed a gain of 1 per cent, in contrast to the decline of over 1½ per cent which occurred in the second quarter of the year. Labour income, which was virtually unchanged between the first and second quarters, advanced by 1 per cent in the third quarter, and the steep decline in corporation profits which had occurred earlier was not repeated in the third quarter, as profits remained relatively stable. At the same time, disposable income, which had shown a drop of about 1½ per cent in the previous quarter, advanced by more than 2 per cent, as higher earnings from productive activity were supplemented by increased transfer payments from government and a decline in direct personal tax collections. The rate of personal saving made a substantial recovery, to 6 per cent of disposable income, following the steep decline of the second quarter.

In the first nine months of this year, Gross National Product has averaged 2.9 per cent above the same period of 1959.[1] Approximately one-half of this increase represents a further advance in final product prices, so that in physical volume terms the Gross National Product shows a gain of about 1½ per cent. The post-war average increase in the physical volume of output has amounted to approximately 4 per cent per year, and was 3.5 per cent in the year 1959.

The small advance in output in 1960 was accompanied by broad changes in the composition of the nation's income and outlay. The following Table provides some perspective on the nature and magnitude of these shifts in terms of year-to-year percentage changes in the main expenditure components.

[1] A comparison of the first nine months of this year (seasonally adjusted at annual rates) with last year's annual average yields a somewhat smaller value increase of 2.2 per cent.

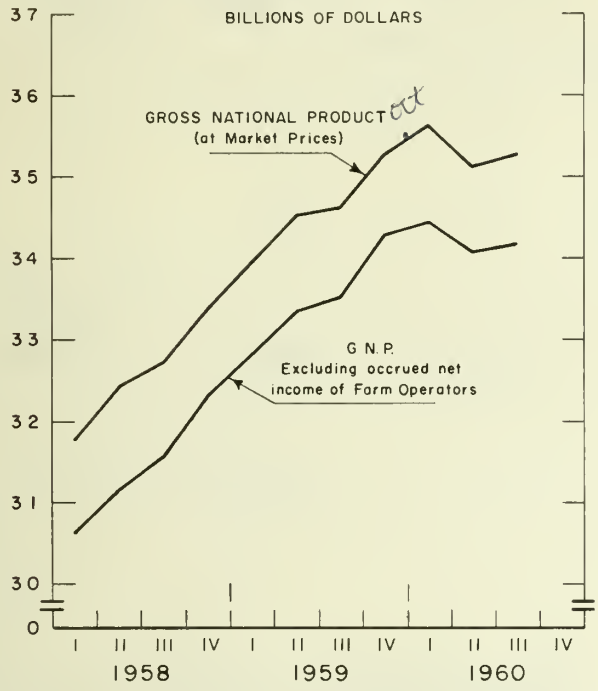

## Quarter to Quarter Changes in Final Purchases

| Indirect taxes | 9.6 | 5.0 | 3.9 |

[1] Seasonally adjusted at annual rates.

**Value, Volume and Price Comparisons**

Taking the price change of all components together, it is estimated that the price element of Gross National Expenditure was higher in 1960 by 1.6 per cent, as compared with 2.3 per cent between the year 1958 and 1959. It may be noted, however, that prices in the first nine months of this year have been relatively stable and that the year-to-year increase in the nine months' averages reflects price advances which occurred earlier. The value, volume and price change for each of the main expenditure categories are shown in the following Table.

**Percent Changes, Value, Volume and Price**

| | 1st 3 Quarters 1959 / 1st 3 Quarters 1960 | | | Year 1958 to Year 1959 | | |
|---|---|---|---|---|---|---|
| | Value | Volume | Price[1] | Value | Volume | Price[1] |
| Personal expenditure | 4.1 | 2.9 | 1.2 | 5.8 | 4.5 | 1.2 |
| Goods | 3.4 | 2.8 | 0.7 | 5.3 | 4.9 | 0.5 |
| Non-durables | 4.8 | 4.0 | 0.8 | 5.0 | 4.9 | 0.3 |
| Durables | -2.2 | -2.3 | 0.3 | 6.3 | 4.7 | 1.8 |
| Services | 5.3 | 3.2 | 2.2 | 6.8 | 3.7 | 2.7 |
| Government expenditure | 3.3 | -0.6 | 2.8 | 4.5 | 1.2 | 2.9 |
| Gross Fixed Capital Formation | -5.2 | -7.4 | 2.4 | -0.2 | -2.9 | 3.0 |
| New residential construction | -13.6 | -15.7 | 2.6 | -1.1 | -5.0 | 4.1 |
| New non-residential construction | -0.3 | -2.7 | 2.6 | -7.8 | -10.1 | 2.6 |
| New machinery and equipment | -4.5 | -6.6 | 2.0 | 9.4 | 6.9 | 2.5 |
| Exports of goods and services | 7.3 | 5.5 | 0.8 | 5.1 | 2.2 | 1.5 |
| Imports of goods and services | 1.3 | -0.1 | 1.3 | 9.5 | 10.1 | -0.4 |
| Gross National Expenditure | 2.9 | 1.6 | 1.6 | 6.1 | 3.5 | 2.3 |

[1] The price comparisons shown above are based on a set of fixed weight price indexes (1955 = 100), and not upon the implicit price deflators which can be derived by dividing the value series by the volume series. The latter are weighted by changes in the expenditure pattern over time. A specially constructed set of fixed weight price indexes has therefore been used for purposes of depicting price changes in the above table.

As previously noted, the volume increase in Gross National Expenditure in the first nine months of 1960 was 1.6 per cent. This gain was accompanied by an increase in the population of 2.2 per cent; thus, in per capita terms, there was a slight decline in the volume of output in 1960, on the basis of nine months' data. The three major domestic demand sectors, consumer spending, government spending, and capital investment, all showed either smaller increases in the rates of growth, or larger declines, when compared with a year ago. The only demand category to show an increase in the rate of growth was exports of goods and services, which advanced by about 5½ per cent as compared with 2 per cent between 1958 and 1959.

**Production and Employment**

Related indicators of real output by industry show little overall change in the volume of production between the second and third quarters, on a seasonally adjusted basis. Production in both the goods-producing and the service-producing industries showed only fractional movements.

Within the major goods-producing industries, production was off by 1 per cent in manufacturing and by 2 per cent in mining, but these declines were offset by a moderate increase in output in construction and public utilities and a substantial gain in output in forestry.

The estimated 1 per cent drop in manufacturing output in the third quarter mainly reflected an easing in activity in the durable manufacturing industries. However, non-durable manufacturing was also slightly lower. The changes in the major industrial groups within both durables and non-durables were mixed and to a considerable degree offsetting. Among the component industries of durable manufacturing, sizable production declines occurred in heating and cooking apparatus (-14 per cent), telecommunication equipment (-8 per cent), primary iron and steel (-3 per cent), and motor vehicle parts and accessories (-7 per cent); substantial increases took place in cement (+11 per cent), concrete products (+8 per cent), and gypsum products (+6 per cent).

Mining production was down nearly 2 per cent in the third quarter, with moderate to marginal declines in the four major groups — fuel mining, non-metal mining, quarrying, and metal mining. So far as the individual metals or minerals are concerned, the major declines were in iron ore (-12 per cent), asbestos and zinc (-5 per cent), and crude petroleum

(−6 per cent); partially offsetting increases occurred in the output of nickel (+5 per cent), natural gas (+7 per cent), and lead (+9 per cent).

Employment, like production, remained virtually unchanged between the second and third quarters, apart from seasonal factors. However, with the continuing growth of the labour force, unemployment as a percentage of the labour force rose from 6.9 to 7.3 per cent between the two periods, on a seasonally adjusted basis.

Turning to developments over the first nine months of the year, it is estimated that the physical volume of output was higher than in the same period of 1959 by about 1½ per cent. Both the goods and service-producing industries showed gains of about the same order.

Among the primary industries, a small increase is indicated for agricultural output (in the nine months' comparison), reflecting a larger crop of better quality. Output in forestry was higher by more than 12 per cent, associated with greatly increased output of pulpwood and increased activity in other logging operations, which has been adversely affected in 1959 by the prolonged strike in the woods industry in British Columbia. Mining output was higher by more than 2 per cent, with marginal to substantial gains in metal mining, non-metals and fuels; a reduction in output in quarrying is related to lower activity in the construction industry.

A 1 per cent increase in production in manufacturing was the outcome of a gain of nearly 3 per cent in the non-durable industries, partially offset by a fractional decline in durable industries. Most of the non-durable goods industries increased their output, the gains ranging from 1 per cent in foods and beverages to 14 per cent in both tobacco and chemical products; production was lower in textiles, clothing, leather and rubber products.

While there was some increase in production of manufactured wood products over the nine months of the year, the only durable goods manufacturing industry to increase its output substantially was non-ferrous metal products (10 per cent); the gain was related to higher production of aluminum and nickel. Production of non-metallic mineral products was down 7 per cent, iron and steel 3 per cent and transportation equipment 2 per cent.

In a situation of reduced activity in construction, particularly in the housing sector, real output in the construction industry is estimated to have been lower by 7 per cent.

Real output increased in all the service industries in 1960, ranging from a fractional increase in trade to a 4 per cent increase in finance, insurance and real estate. Production of communication services continued to expand by a substantial amount, while activity in transportation was only moderately higher, reflecting the lower volume of traffic handled by the railways, more than offset by increased activity in other modes of transport.

In the nine months' comparison, the increase in employment in 1960 is close to 2 per cent over the comparable period of 1959, that is, approximately the same as for the increase in production. Most of the expansion in employment in 1960 took place in trade, finance, insurance and real estate and services, all industries having a high proportion of women workers. Female employment over the nine months was higher by 5.6 per cent, and male employment by only 0.5 per cent. The increase in employment of both males and females together fell short of the growth in the labour force, and unemployment as a percentage of the labour force was running at an average rate of 7.0 per cent of the labour force in 1960 compared with 6.3 per cent in the first nine months of 1959.

**Employment by Industry — All Status Groups**

| | Average first 9 mos. 1959 | Average first 9 mos. 1960 | Percentage change |
|---|---|---|---|
| | '000s of persons | | |
| Agriculture | 706 | 683 | −3.3 |
| Other primary industry[1] | 186 | 203 | 9.1 |
| Manufacturing | 1,493 | 1,470 | −1.5 |
| Construction | 439 | 414 | −5.7 |
| Transportation and other utilities | 520 | 518 | −0.4 |

| Finance, insurance and real estate | 215 | 227 | 5.6 |
| Service | 1,339 | 1,449 | 8.2 |
| Males | 4,340 | 4,360 | 0.5 |
| Females | 1,490 | 1,573 | 5.6 |
| **Total employed** | **5,830** | **5,933** | **1.8** |

[1] Includes forestry, fishing and trapping, mining, quarrying and oil wells.

**Exports and Imports of Goods and Services**

The sharp drop in exports of goods and services which marked the second quarter of 1960 was reversed in the third quarter when receipts from current international transactions rose 6½ per cent, after allowing for seasonal factors. At a seasonally adjusted annual rate of $7.1 billion, exports of goods and services were running only slightly below the record established in the first quarter of this year. At the same time, imports of goods and services were again slightly reduced, and at an annual rate of $8.0 billion, were about 1 per cent lower than in the preceding quarter. Thus, the deficit on current account contracted by more than one-third between the two quarters, from $1.4 billion to $0.8 billion. Both the goods and the service items in the current international account contributed to this narrowing of the deficit in the third quarter, though the goods were by far the more important contributing factor.

Merchandise exports, seasonally adjusted, rose nearly 7 per cent between the two quarters. The main contributing commodity groups were agricultural products (+25 per cent), iron and steel (+13 per cent), and non-ferrous metals and products (+10 per cent). Merchandise imports, continuing to recede from the record level of the first quarter of 1960, were lower by almost 2 per cent. Complete commodity detail is not yet available, but the decline appears to have occurred in iron and its products, and to a lesser extent, in agricultural products and non-metallic mineral products. The consequence of the divergent movement in merchandise exports and imports was a small surplus on commodity account, the first since early in 1955.

Receipts from services, seasonally adjusted, rose by 5 per cent in the third quarter, mainly as a result of a significant increase in gold available for export and in receipts from interest and dividends. Payments for services rose by less than 1 per cent. Thus the large deficit on service account was somewhat narrower in the third quarter.

Turning to consider the first three quarters of 1960 with the same period of 1959, commodity exports show a substantial advance, amounting to about 8 per cent; the bulk of this year-to-year increase was concentrated in the first quarter (see accompanying Table). Second quarter exports fell somewhat below the exceptionally high level of the same period of 1959, but the increase in the third quarter comparison was again substantial, if less spectacular than in the first quarter comparison. Industrial materials largely account for the rise in exports, the greatest contributors being copper, newsprint, nickel, aluminum, and chemicals. Partially offsetting losses occurred in shipments of wheat and other grains, uranium and farm implements. It is notable that all of the rise in exports is attributable to the strength of demand from overseas countries; exports to the United States were virtually unchanged. The expansion in exports to countries of the European Common Market is particularly striking; the increases in sales to Japan and the United Kingdom were also very large. The accompanying Table shows the changes in exports by leading commodities and leading countries in the first three quarters of 1960 compared with the same period of 1959.

**Domestic Exports**

| Leading commodities | Percentage change | | | |
|---|---|---|---|---|
| | 1Q 1960 / 1Q 1959 | 2Q 1960 / 2Q 1959 | 3Q 1960 / 3Q 1959 | 9 mos. 1960 / 9 mos. 1959 |
| Newsprint paper | 16.9 | - 1.1 | 5.0 | 5.9 |
| Wheat | - 0.9 | -30.6 | 3.6 | -11.3 |
| Lumber and timber | 18.3 | - 4.5 | 12.4 | 7.4 |
| Wood pulp | 9.8 | 1.3 | 2.3 | 4.3 |
| Uranium ore | 7.0 | -21.7 | -19.8 | -11.8 |
| Aluminum and products | 75.6 | 9.0 | - 2.6 | 21.6 |
| Nickel | 88.1 | - 4.0 | 12.9 | 24.7 |
| Copper and products | 134.5 | 20.4 | 42.5 | 54.6 |
| Fish and fishing products | -13.8 | - 6.0 | 2.1 | - 5.3 |
| Farm machinery and implements | -16.2 | -29.7 | -16.7 | -21.9 |
| **Total domestic exports** | **22.9** | **- 2.9** | **7.5** | **8.1** |
| Leading countries | | | | |
| United States | 18.3 | -10.1 | - 4.7 | - 0.3 |
| United Kingdom | 29.3 | 13.6 | 19.4 | 20.2 |
| European common market countries | 36.8 | 19.7 | 50.5 | 36.1 |
| Japan | 61.0 | 2.6 | 26.7 | 27.9 |
| Other | 22.8 | 1.5 | 25.4 | 15.6 |
| **Total domestic exports** | **22.9** | **- 2.9** | **7.5** | **8.1** |

Commodity imports show only a fractional increase in the nine months' comparison, with generally small and offsetting changes in the main commodity groups. Eight months' commodity detail suggests some increase in cotton and products, passenger cars and trucks, non-farm machinery, and a substantial reduction in imports of farm implements.

In the first three quarters of 1960 the current account deficit was about $0.8 billion, compared with $1.1 billion in the same period a year ago. This contraction is entirely attributable to the rise in merchandise exports to overseas countries; the deficit on service transactions continued to rise.

**Investment in Non-Farm Business Inventories**

A sharply declining rate of accumulation of business inventories was apparent in the first half of 1960, and in the third quarter this slackening in the rate of build-up gave way to a considerable liquidation. Stocks were drawn down for all major industry groups with the notable exception of retail trade. The pattern of change in business inventories by broad industrial groups over the past four quarters is shown in the accompanying Table.

**Change in Business Inventories**
(Seasonally adjusted at annual rates)

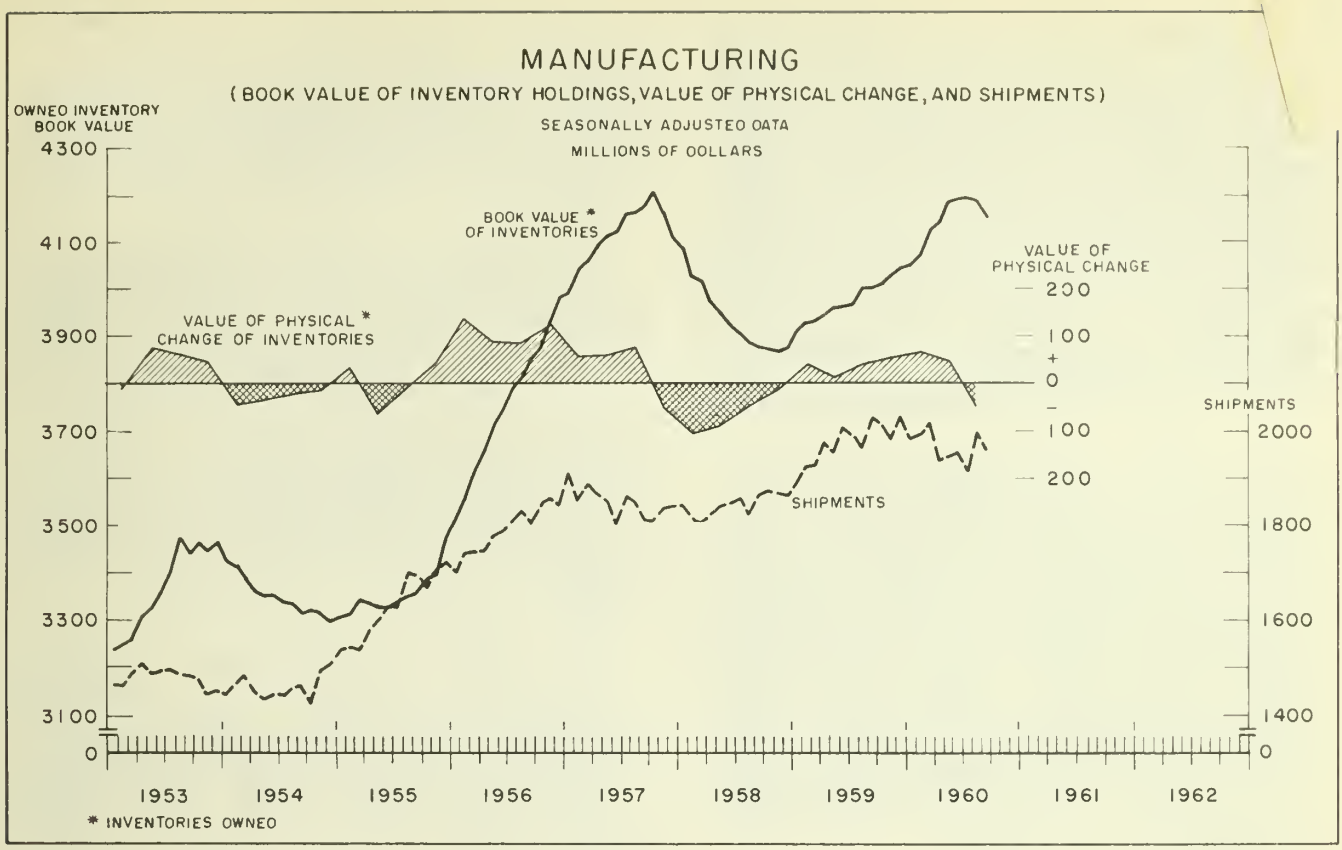

| | 4Q 1959 | 1Q 1960 | 2Q 1960 | 3Q 1960 |
|---|---|---|---|---|
| | millions of dollars | | | |
| Manufacturing | 208 | 256 | 184 | -200 |
| Durables | 168 | 84 | 208 | - 28 |
| Non-durables | 40 | 172 | - 24 | -172 |
| Retail trade | 40 | 228 | 20 | 120 |
| Motor vehicle dealers | -112 | 92 | 128 | 12 |
| Other | 152 | 136 | -108 | 108 |
| Wholesale trade | 52 | 104 | 44 | -160 |
| Other industries | - 4 | 8 | - 4 | - 96 |
| **Totals** | **296** | **596** | **244** | **-336** |

Among the factors affecting inventory behaviour this year are the absence of any clear-cut upward trend in production and sales, the softening in some prices, the ease of obtaining quick delivery on order (reflecting ample capacity), and perhaps also a long-term trend toward more efficient control of inventories.

In manufacturing industries the rate of liquidation in the third quarter was somewhat in excess of the rate of accumulation in the immediately preceding quarter. Liquidation was much the most pronounced in non-durable manufacturing industries where it was fairly general but particularly large in food items. Trends were mixed in the durable goods industries with liquidation in iron and steel and electrical apparatus, but further accumulation in non-ferrous metal products, non-metallic mineral products and wood products.

While stocks were also drawn down in wholesale trade, the shift from accumulation to liquidation was not so pronounced as in manufacturing. Liquidation was fairly general among wholesale groups, both durable and non-durable.

In retail trade, a sharp increase in the rate of accumulation was the outcome of opposing movements in stocks of durable and non-durable goods. The rate of build-up in the durables group dropped sharply, mainly reflecting the behaviour of automotive dealers who were attempting to clear 1960 models. However, retail stocks in non-durable lines shifted markedly from liquidation in the second quarter to a considerably higher rate of accumulation in the third quarter. As has been noted, this development was accompanied by only a small advance in consumer spending for non-durable goods in the third quarter, following the very strong gains which were made in the second quarter of this year, particularly in the clothing group. The behaviour of stocks in apparel stores was especially marked by the shift from liquidation in the second quarter to substantial accumulation in the third. While this was the predominant pattern for most non-durable groups between the second and third quarters, in some lines inventory holdings moved in the opposite direction.

**Business Gross Fixed Capital Formation**

Following two quarters of decline, business gross fixed capital formation (including outlays for new housing) advanced by 1½ per cent in the third quarter, and was running at a seasonally adjusted annual rate of $6.5 billion. This reversal in the quarter-to-quarter movement in private capital outlays is attributable to expanded activity in construction, both residential and non-residential. Expenditures for machinery and equipment declined for the fourth quarter in succession.

A 7 per cent increase in outlays for new housing in the third quarter brought the level to a seasonally adjusted annual rate of $1.5 billion, following a precipitate decline in the second quarter. This reversal in trend reflected in part the increased availability of mortgage funds at mid-year, particularly under the National Housing Act. Direct Central Mortgage and Housing Corporation lending had been resumed in April and there were significant increases in lending activity of the life insurance, loan and trust companies in August and succeeding months. The rate of housing starts in all areas, seasonally adjusted, rose by 18 per cent in the third quarter, while the rate of completions remained virtually unchanged.

The rise in outlays for non-residential construction and the decline in expenditures for machinery and equipment in the third quarter were virtually offsetting. Total investment in plant and equipment in the third quarter was at a seasonally adjusted annual rate of $5.0 billion, about the same as in the second quarter.

In the first three quarters of this year, the rate of capital spending as a whole was running about 5 per cent below the average for the full year 1959. Much the most pronounced decline occurred in outlays for housing which were down by about 12 per cent in this comparison. Expenditures for non-residential construction were running close to last year's average but investment in machinery and equipment was lower by 5 per cent. Thus the present estimates of total business fixed capital formation up to the end of the third quarter of 1960 indicate that the expectations of a modest increase over the year 1959, as expressed in the mid-year review of investment intentions, published earlier this year, is not likely to be met.

**Personal Expenditure on Consumer Goods and Services**

In the third quarter of 1960 personal expenditure on consumer goods and services was running at a seasonally adjusted annual rate of $23.1 billion, about the same as in the second quarter. With little overall change in consumer prices, real consumption remained unchanged. Weakness in the demand for durable goods acted to restrain the expansion of consumer spending; purchases of non-durables and services were both somewhat higher.

A fractional increase in consumer spending on non-durables in the third quarter contrasts with the sharp rise in the second quarter and a moderate decline in the first. The movements in the non-durable categories in the third quarter were diverse; increases occurred in spending on food, tobacco, electricity and other household supplies, and in the expenditures related to the use of automobiles; purchases of clothing, fuel, and alcoholic beverages were lower. Prices of non-durable goods fell between the two quarters, chiefly reflecting a 1 per cent drop in the price of food, after account is taken of seasonal factors. The gain in real consumption of non-durables was therefore somewhat larger than the small increase indicated by the value figures.

The decline of 3½ per cent in purchases of durable goods in the third quarter follows a succession of somewhat smaller declines in each of the two preceding quarters. The third quarter drop in spending on new cars is estimated at 7½ per cent, but this was partly offset by a small increase in net purchases of used cars. Cars of North American origin, and cars of British and European origin each shared in the decline. The downward trend in purchases of furniture, appliances and radios, evident in the first half of the year, continued in the third quarter; the only item to show a small increase was the home furnishings group. With prices little changed, the fall in durable goods purchases in real terms in the third quarter closely matched the decline in the value figures.

Consumer spending on services continued to rise in the third quarter. About one-half of tne 1 per cent increase in services is estimated to be attributable to the upward movement of prices in the service sector.

The relatively unchanged level of consumer spending in the third quarter was accompanied by a rise in personal disposable income of close to 2½ per cent. While there was a significant rise in the rate of personal saving, bringing it to nearly 6 per cent of disposable income, the rate remained below the average level of the years 1958 and 1959.

In the first nine months of 1960, total consumer expenditures have shown an increase of about 4 per cent over the same period of 1959. With overall consumer prices higher by about 1 per cent, the gain in the real volume of consumption is estimated to be about 3 per cent. Adjusting these figures for the increase in population between the two years, the gain in real per capita consumption is estimated to have amounted to somewhat less than 1 per cent. Although small by post-war standards, this increase is in contrast to the declines in real per capita consumption that occurred in 1951, 1954, 1957, and 1958.

The pattern of consumer spending in the recent past has altered considerably. This is evident in the accompanying Table, which compares the year-to-year changes in the main categories of consumption for the period 1958 to 1959, and the first nine months of 1959 to 1960. Whereas rising consumer demand for durable goods provided an expansionary influence on the economy in 1959, the reverse is true of the year 1960. Virtually all categories of durables were so affected. Some of the weakness in the market for household durables is probably related to the decline in activity in housing from the extremely high levels characteristic of 1958 and 1959.

**Consumer Expenditure**

| | Per cent change | |
|---|---|---|
| | Year 1958 to Year 1959 | 3 Quarters 1959 to 3 Quarters 1960 |
| Food | 3.4 | 3.1 |
| Clothing | 4.2 | 2.6 |
| Other | 7.6 | 8.0 |
| Total non-durable goods | 5.0 | 4.8 |
| Appliances and radios | 6.1 | -5.7 |
| Home furnishings and furniture | 3.2 | -2.6 |
| Autos (New and used) | 8.8 | -1.4 |
| Other | 3.9 | 0.9 |
| Total durable goods | 6.3 | -2.3 |
| Total all goods | 5.3 | 3.4 |
| Total services | 6.8 | 5.3 |
| Total personal expenditure (Goods and services) | 5.8 | 4.1 |

## CHANGES IN INCOME COMPONENTS

National Income, seasonally adjusted, rose by 1 per cent in the third quarter. All the major components, with the significant exception of corporate profits, shared in this advance. Income in the personal sector rose somewhat more than National Income, and personal disposable income rose still more – by nearly 2½ per cent. A significant drop in personal direct taxes between the second and third quarter reflects in part the high level of collections in the second quarter when taxpayers were settling their tax bills on the basis of the increased rates which had become effective at mid-1959.

Labour income rose by about 1 per cent in the third quarter, after having been virtually unchanged in the second. Increases occurred in most industries but the changes were for the most part rather small. The largest increase occurred in forestry, where labour income rose more than 6 per cent. Labour income in manufacturing fell fractionally, reflecting a slight drop in employment, partly offset by somewhat longer hours of work and higher average earnings.

In the first nine months of 1960, labour income was 4 per cent higher than in the same period of 1959. Much the largest gain – over 20 per cent – occurred in forestry, reflecting in part the losses arising out of the industrial dispute that had interrupted employment in the industry in British Columbia in 1959. The gains in the service-producing industries continued to be relatively large, amounting to about 5 per cent in trade and finance, insurance and real estate, and more than 7 per cent in government and non-government service; this trend reflects the further expansion of employment in these areas. Labour income in manufacturing was moderately higher and in mining slightly higher. Construction was the only major industry group to record a decline in labour income in the nine months' period.

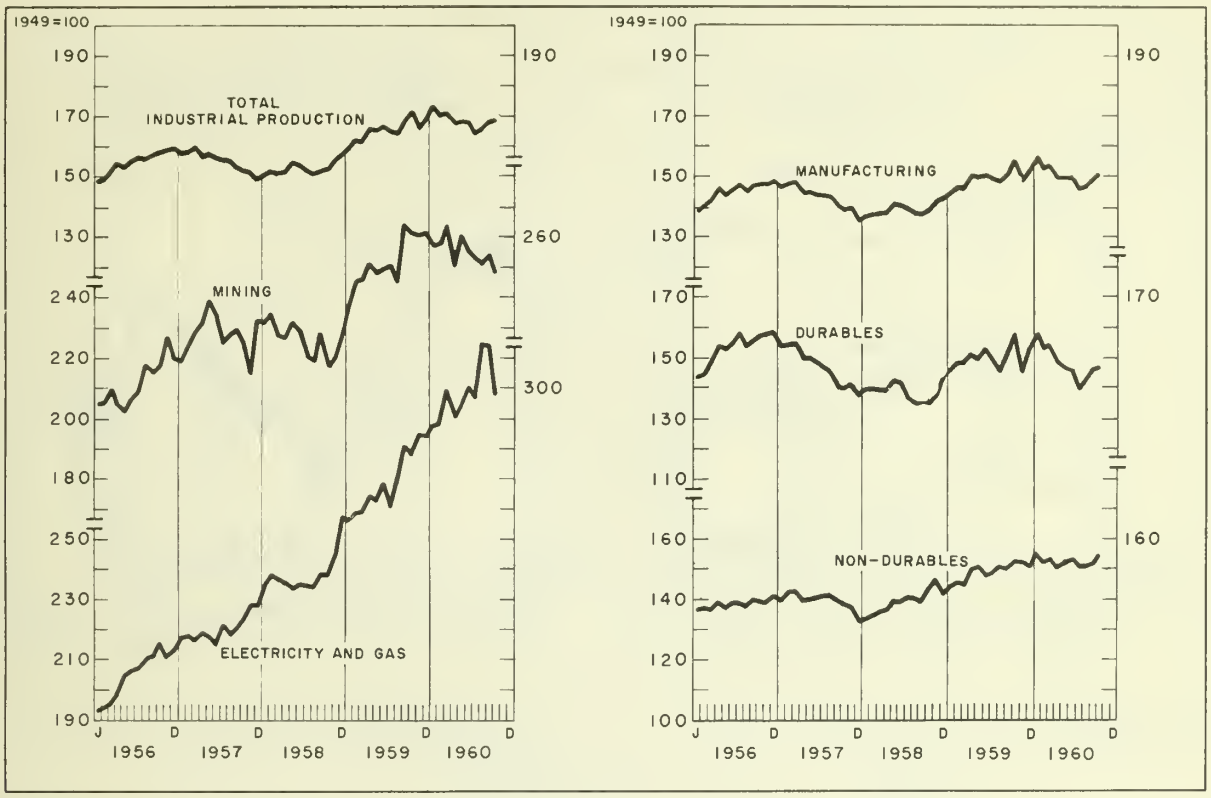

After having fallen sharply in the second quarter of 1960, corporate profits showed little change in the third quarter, after seasonal adjustment. This stability in total corporate profits was the outcome of conflicting movements in the profits of individual industries. Profits in the finance, insurance and real estate group rose sharply, but a small decline occurred in manufacturing. Profits in transportation were adversely affected by the decline in the volume of traffic carried by the railways, and the widespread weakness in retail sales reduced profits in the trade group.

The recent stability in corporate profits, following the decline in the two preceding quarters, leaves total corporate profits in the first nine months of the year about 6 per cent lower than in the same period of 1959. A deterioration in profits was a fairly common experience among industries in this comparison. The sharpest drop was in wholesale and retail trade where it amounted to about 22 per cent. The drop in manufacturing profits was about 8 per cent, with the sharpest declines in the iron and steel and non-metallic mineral sub-groups, offset to some extent by substantially higher profits in paper products and products of petroleum and coal. Mining, quarrying and oil wells and the finance, insurance and real estate industries recorded a decided improvement in profits in the nine months' comparison.

## PRODUCTION*

The index of industrial production rose fractionally in October, following stronger advances in August and September. Manufacturing production rose by 1.5 per cent, with gains in both durables and non-durables; these gains were almost offset by declines in mining and electricity and gas.

| | Gross National Product at Market Prices | | Total Industrial Production | Mining Production | Manufacturing Production | | | Electricity and Gas |
|---|---|---|---|---|---|---|---|---|
| | Total[2] | Non-farm[2] [3] | | | Total | Durables | Non-durables | |

## EMPLOYMENT, EARNINGS AND HOURS WORKED*

The composite index of industrial employment fell fractionally in October reflecting decreases in most components.

Average hours worked per week in manufacturing declined in October.

| | | Industrial Composite Employment (1) | Manufacturing (2) | | | Construction: Building and General Engineering (2) | Mining (2) | Manufacturing | | Average Hours Worked per Week in Manufacturing (2) | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Total | Durables | Non-durables | | | Average Weekly Wages and Salaries | Average Hourly Earnings | Total | Durable Goods | Non-durable Goods |
| | | 1949=100 | | | | | | Dollars | | | | |

(1)Averages of unadjusted data. (2)Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

## LABOUR FORCE AND LABOUR INCOME

Both the total labour force and employment in November were approximately unchanged from October levels. Unemployment amounted to 7.5 per cent of the labour force.

Total labour income and labour income in manufacturing were unchanged in October.

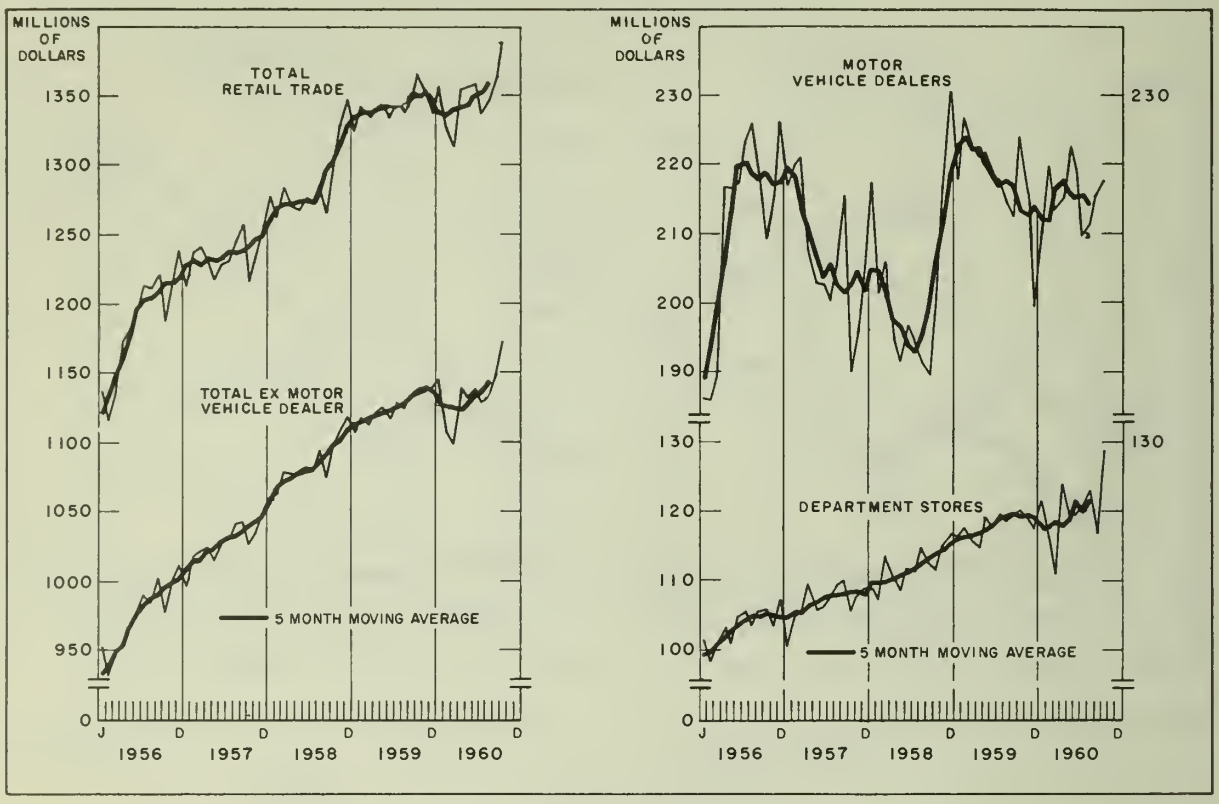

| | Civilian Labour Force[3] | | | | | | Labour Income | |
|---|---|---|---|---|---|---|---|---|
| | | | Employed | | | | | |

[1]Averages of unadjusted data. [2]Percentage seasonally adjusted. [3]The data printed here are revised in accordance with the new definitions of "employment" and "unemployment" which came into effect in the September, 1960 issue of *The Labour Force*. The series "Paid Workers Non-Agricultural" carried in previous issues is temporarily discontinued on the seasonally adjusted basis.

## RETAIL TRADE*

Total retail trade increased in October for the third consecutive month, reflecting increases in most store types.

| | | Retail Trade Total | Retail Trade (ex motor vehicle dealers) | Motor Vehicle Dealers[3] | New Passenger Car Sales[2] | Commercial Vehicle Sales[2] | Department Stores | Grocery and Combination Stores | Furniture plus Radio and Appliances |

*More detailed information on retail trade, Seasonally Adjusted, can be found in Table 46.

[1]Averages of unadjusted data. [2]Source: Sales of New Motor Vehicles and Motor Vehicle Financing. [3]Includes sales of new and used cars, trucks and buses, repair parts and services, tires nnd tubes, storage batteries, gasoline, some farm implements and n small amount of wholesale trade.

## CONSTRUCTION AND BUILDING PERMITS

Housing starts in November were roughly unchanged, but completions were higher.

Commercial building permits rose sharply in October, continuing the rise of the previous two months.

## EXPORTS, IMPORTS AND MISCELLANEOUS SERIES

Exports in November fell off, although imports rose sharply.

Total revenue cars loaded were higher in November.

| | | Value of Domestic Exports of Goods | Value of Imports of Goods | Carloadings of Revenue Freight: Total Revenue Cars Loaded | Carloadings of Revenue Freight: Grain and Grain Products | Carloadings of Revenue Freight: All other (ex Iron Ore) | Industrial Common Stocks | Consumer Credit Outstanding[2]: Selected Items [3] | Consumer Credit Outstanding[2]: Total [4] | Corporation Profits before Taxes [5] [6] | Personal Disposable Income [5] | Farm Cash Income |

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. (6)Average of weekly rates. (7)Revised according to new bench marks. (8)This total includes all generating agencies producing over ten million kilowatt hours per year. (9)End of period. Including personal savings deposits.

(1)"De facto" population. Annual data are for June. (2)At current market prices. Annual data are totals of the four quarters. (3)Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4)All manufactured products. (5)Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates. (6)Annual data are for June.

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.
[1]Not applicable to figures on population and immigration. [2]Yukon and North-West Territories not included in figures for births, marriages and deaths. [3]Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year. [4]Exclusive of stillbirths. [5]Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

(1)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. (2)Includes adjusting entry. (3)Includes residual error of estimate. (4)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. (5)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see **D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57."**

(1)The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

[1]Seasonal (formerly supplementary) benefit data included. [2]On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included. [3]The number of new cases of recorded unemployment among insured persons. [4]Estimates are based on average weekly number of payments. [5]The number of calendar weeks during which a benefit payment was made. [6]Revised to relate to the Thursday nearest to the last day of the month. [7]Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957–June 1958 which included fishing claimants. **Source: Unemployment Insurance Commission and monthly reports of Unemployment Insurance Branch, D.B.S.**

[1]The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. [2]The annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1). **Source: Labour Gazette, Department of Labour.**

[1]In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. [2]Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs. [3]Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. [4]Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3]Customs exports. [4]Mill shipments destined for export.

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

(1)Shipments for further processing within own firm and for sale in Canada. (2)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

[1]Includes some silvery pig iron formerly included with ferro-alloys. [2]Excluding shipments for processing. [3]Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings. [4]Monthly average. [5]Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis. **Source: New Residential Construction, D.B.S.**

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. [1]Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. **Source: Building Permits, Business Finance Division, D.B.S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1959, stands at 1,014, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

[1]Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. [2]Planks and boards, flooring and square timber. [3]Hollow blocks including fireproofing and load-bearing tile. [4]For building insulation only. [5]Figures cover the production of firms which normally account for 85 per cent of the total for Canada. [6]Includes concrete chimney blocks.
[7]Factory sales of firms which normally account for 96% of total Canadian production.

*See also Tables 18 and 19. (1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. (2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (4)Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

[1]Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. [2]Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3]Annual data are monthly averages of crop year. [4]Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. (1)Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. (2)Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. (3)Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. (4)In addition to the items shown here, qunrterly figures are available on the use of oil companies' credit cards. Balances were as follows:

| June 1958-31 | Sept. 1958-39 | Dec. 1958-35 | Mar. 1959-32 | June. 1959-36 | Sept. 1959-44 | Dec. 1959-40 |
|---|---|---|---|---|---|---|

(5)Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. (6)Figures for dates otber than year ends are estimatcd on the basis of the loans by twelve companies.

[1]Data in this table refer to railways with annual operating revenues of $500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. [2]As of January, 1958, statistics include the British Columbia Electric Railway. [3]As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. **Source: Railway Operating Statistics, D.B.S.**

[1]Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2]Mainly deposits of foreign banks. [3]Capital, rest fund and undivided profits as at the latest fiscal year-end. [4]Including issues payable in foreign currency. [5]Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6]Excluding Canadian day to day loans. [7]Loans to grain dealers and exporters. [8]Loans to finance purchase of Canada Savings bonds at time of issue. [9]Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10]Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks. [2]Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada. [3]Less total float, i.e. cheques and other items in transit (net). [4]At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about $140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date. **Source: Statistical Summary of Bank of Canada.**

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

[1]The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1)Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction. Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(2)Includes, in addition to the industries listed, Tobacco,

(3)Includes Printing and Publishing and Allied Industries.
